the big green book: *For The Earth* Quinton Ramsey, 2014-08-12 In 1962 the shortest war in history was fought between two superpowers. In the space of an hour cities were annihilated and millions of people were dead. But nuclear war was just the beginning. It was during The Darkness, in the ruins of the old world where life fought to exist, that a new counter culture movement was founded. Humanity was divided between the governments that clung to control of their land and the united people of The Green, who sought an end to that control. And so as the ash settled and light returned to the earth, the Revolutionary War began and humanity fought itself for the right to rule. After nearly a decade of war a stalemate was reached; the established governments forced back into heavily fortified cities where the Green would not chance an attack. At the cost of two billion lives, a ceasefire was agreed; an uneasy peace that would last for over thirty years. But now, in 2014, tensions are rising again. Many of the Free Cities are falling apart from within, resources stretched for decades are at breaking point, giving people little choice but to push out into the plentiful lands beyond their walls. At the same time rogue elements of The Green Army, cast out by The Green for their no longer useful blood lust, plot the final destruction of the Free Cities.

the big green book: *Rebirth in the Life and Works of Beatrix Potter* Richard Tuerk, 2020-02-24 This work traces the concepts of initiation, transformation and rebirth through Beatrix Potter's personal writings and her children's fiction. Her letters and journals reveal attempts to escape from what she called her unloved birthplace and her overbearing parents. Potter felt that her life culminated in her forties, when she was, in effect, reborn through marriage as Mrs. William Heelis, a farmer raising Herdwick sheep and buying land for the National Trust. From her first book, *The Tale of Peter Rabbit*, through some of the last, such as *The Fairy Caravan* and *The Tale of Little Pig Robinson*, central characters undergo processes of initiation during which they mature toward adulthood. The most successful ones move from being helpless children to more mature creatures on their way to independence, while others experience no change or even regression.

the big green book: *A Mortal Angel* Kimberly Wetzal, 2024-07-17 How am I supposed to just let go of this? I sat on our loveseat and closed my eyes, resting my head on the back of the cushion. The details of Kade's birth washed over me. This did nothing to soothe the anger rumbling under my skin. There was too much anger and resentment and I didn't know how I would move past these feelings toward Kade's biological mother. With the recognition of my dark thoughts and feelings toward Kade's mother, the words came to me. She is my daughter, too and her life wasn't as easy as yours. Before I could stop it, an image of Christ followed the words. I saw ribbons of flesh dangling from His body and bruises that painted His skin in blacks and blues from the brutal whippings and torture inflicted upon Him by the men He had atoned for in the Garden of Gethsemane. Yet, instead of anger or hatred, He had said, "Father, forgive them, for they know not what they do." From the moment Kade Wetzal was born, his life was an uphill climb. Following a horrific brain injury at birth, he battled cerebral palsy and daily pain all his life. Despite his pain, Kade Wetzal not only had a smile on his face but also taught his family and those around him to rely on the Savior, Jesus Christ. Kade's adopted mother, Kim, would witness miracles unfold in lonely hospital rooms. She would see angels sent to help the family physically, emotionally, and spiritually. Kade's journey was one of hope, faith, charity, and love. Though his journey met an unexpected twist, he was able to spread these messages without speaking a single word.

the big green book: Mother Nature's Plan Willie Bevan, 2022-11-21 With the world's food supply controlled by greedy, evil corporations, the Earth is dying and needs help. Mother Nature and Father Time knew this day would come and have devised a plan. Long ago, they sent twelve families of magical creatures—two elven changelings, two skyroamers, and several gnomes—to different forests around the globe, with a chest and a codex. To help save Earth and humanity, the leader of each family is to unlock their chest using the codex on a special date. Though most of the families hide their chest and codex to protect them when they arrive at their new homes, one family doesn't. Wanting humans gone and elves and gnomes to rule Earth, the sly gnome Napoleon opens his chest right away and tricks his family to help him persuade big corporations to take land away from small

farmers and poison the Earth with chemicals. With big corporate farms affecting their homes, the other magical families are having difficulty retrieving their chests and codices. Gnomes Mik and Min were in charge of hiding their family's codex, but when the day to open their chest is only weeks away, they can't seem to find it either! Will the families find their chests and codices in time or will they be too late? The first book in the Saga of Mik and Min series, Mother Nature's Plan is an enchanting and adventurous tale about the importance of working together to save and care for our one-and-only Earth.
