this day in history october 11th: Kenneth Whiting Felix Haynes, 2023-08-10 Kenneth Whiting was well-known in the Navy of his day. During his early years after graduating from the Naval Academy, he commanded several early submarines and was known as the first man to escape from a downed submarine. After being trained to fly by Orville Wright, he was the first naval officer to conceptualize a ship that was to become the most important in the US Navy--the aircraft carrier. After submitting his first three unsuccessful proposals to build such a ship, his creativity and aggressiveness were recognized at the start of World War I when he was asked to lead the Navy's First Aeronautical Detachment to France. The FAD was the first American unit to travel to Europe, and within a few months, he negotiated a plan with the French Navy for a system to build naval air stations and train his men in anti-submarine warfare from the air. When the US Navy Department approved the plan, he was transferred to the command of NAS Killingholme on England's North Sea Coast. He built Killingholme into the largest naval air station in Britain. Returning to the US at the end of the war, he found the Navy Department much more willing to talk about building aircraft carriers. Upon the approval of this new ship type, he was placed in charge of converting or building the first six. Along the way, he developed the new systems for the operation of launching and landing aircraft on the new flat flight decks. For his developmental work with the first six carriers and commanding two of them, he is frequently called the Father of the Aircraft Carrier in books and publications about the ship, which was to take the place of the battleship as the king of the seas. Along the way, naval aviation took advantage of his ability to effectively and smoothly advocate for many of the then-fledgling naval aviation's important goals in the public arena. Because he had publicly spearheaded much of those goals, the battleship admirals who ran the Navy of that era were able to take revenge on him and prevent him from being promoted to admiral rank. His tragic death in the middle of World War II became part of the reason his name has been largely forgotten outside the Navy, but naval aviators know him because the field where they are all trained, Whiting Field NAS in Pensacola, is named for him. The military exploits of this American sailor are worth recounting, but the victories of Whiting and his family racing yachts on Long Island Sound make him even more interesting. The goal of this first biography of Kenneth Whiting is to enable those who empower one of today's most important functions--naval aviation--and the Americans who have benefitted from Whiting's work, to remember this hero of naval aviation and submarines.

this day in history october 11th: A Combat Engineer with Patton's Army Lois Lembo, Leon Reed, 2020-06-09 "An engaging and often frightening story" of a member of the 305th Engineering Battalion of the 80th Infantry Division (Andrew Z. Adkins III, coauthor of You Can't Get Much Closer Than This). A Combat Engineer with Patton's Army is the untold story of Frank Lembo, one of George Patton's men who helped move the American command in the battle of Argentan in the Normandy Campaign, in the high-speed pursuit of the German Wehrmacht eastward across France, and in the brutal battles waged during the Battle of the Bulge and during the final combats along the borders of the collapsing Reich. Throughout his time in Europe, Lembo maintained a running commentary of his experiences with Betty Craig, his fiancée and future wife. This extensive correspondence provides a unique eyewitness view of the life and work of a combat engineer under wartime conditions. As a squad (and later platoon) leader, Frank and his comrades cleared mines, conducted reconnaissance behind enemy lines, built bridges, and performed other tasks necessary to support the movement of the 317th, 318th, and 319th Infantry Regiments of the Blue Ridge Division—Patton's workhorses, if not his glamour boys. Frank's letters go beyond his direct combat experiences to include the camaraderie among the GIs, living conditions, weather, and the hijinks that helped keep the constant threat of death at bay. His letters also worked to reassure Betty with hopeful dreams for their future together. Including dozens of previously unpublished photographs, A

Combat Engineer with Patton's Army offers the rare perspective of what day-to-day warfare at the ground-level looked like in the European Theater through the eyes of one of the men spearheading the advance.
