Smart and Gets Things Done: Mastering the Art of Effective Productivity

smart and gets things done—these words perfectly capture the essence of what it means to be truly effective in both personal and professional life. It's not just about intelligence or working hard; it's about combining smart strategies with the ability to follow through and complete tasks efficiently. In today's fast-paced world, being smart and getting things done is a critical skill that can set you apart, help you achieve your goals faster, and reduce stress along the way.

What Does It Mean to Be Smart and Get Things Done?

Being smart and getting things done goes beyond traditional intelligence or book smarts. It involves practical wisdom, emotional intelligence, and a results-oriented mindset. People who embody this quality don't just accumulate knowledge—they apply it effectively. They prioritize, focus on high-impact activities, and avoid distractions. The ability to execute ideas and plans efficiently is just as important as having great ideas in the first place.

The Difference Between Being Busy and Being Productive

One common misconception is equating being busy with being productive. However, the two are far from synonymous. Being busy means you're occupied with tasks, but those tasks may not be moving you closer to your goals. Getting things done requires a strategic approach to work, ensuring that each action has a meaningful outcome.

For example, responding to every email immediately might keep you busy, but it may not be the smartest use of your time if it distracts you from completing a critical project. Smart productivity prioritizes tasks based on impact and deadlines, enabling you to allocate your energy where it truly matters.

Key Traits of People Who Are Smart and Get Things Done

Understanding the traits that characterize effective doers can help you cultivate these qualities in yourself. Here are some standout attributes:

1. Prioritization Skills

Smart individuals know how to distinguish urgent from important. They use prioritization techniques like the Eisenhower Matrix or the Pareto Principle to focus on tasks that yield the greatest results. This skill prevents overwhelm and helps maintain clarity on what needs attention first.

2. Strong Focus and Discipline

Distraction is productivity's greatest enemy. Those who get things done develop habits that minimize interruptions. They set boundaries, manage their environment, and use time-blocking methods to create deep work sessions that maximize focus.

3. Adaptability and Problem-Solving

Plans don't always go as expected. The smartest doers are flexible and resourceful when obstacles arise. Instead of getting stuck, they analyze the situation, pivot strategies, and keep moving forward.

4. Effective Communication

Getting things done often requires collaboration. Clear communication ensures that everyone involved understands expectations, deadlines, and responsibilities. Smart communicators listen actively and provide concise updates, smoothing the path to completion.

Strategies to Become Smarter and More Productive

If you're looking to enhance your ability to be smart and get things done, adopting effective strategies is essential. Here are several actionable tips:

Leverage Technology Wisely

There are countless productivity apps and tools designed to streamline tasks and organize your day. Tools like task managers, calendar apps, and focus timers can help you stay on track. However, the key is to choose tools that complement your workflow rather than overwhelm you.

Set Clear, Measurable Goals

Without clear goals, it's easy to drift or waste effort on low-priority tasks. Define what success looks like for each project or day. Use the SMART criteria (Specific, Measurable, Achievable, Relevant, Time-bound) to set goals that motivate and guide your actions.

Practice Time Management Techniques

Techniques such as the Pomodoro Technique, time blocking, or batching similar tasks can boost efficiency. For example, batching emails or meetings into specific time slots can free up large chunks of uninterrupted time for focused work.

Learn to Delegate

Being smart and getting things done doesn't mean doing everything yourself. Recognizing when to delegate tasks not only saves time but also empowers others and builds a collaborative environment.

Overcoming Common Productivity Pitfalls

Even the smartest people sometimes struggle to get things done due to common productivity challenges. Identifying these pitfalls can help you avoid them:

Procrastination and Perfectionism

Waiting for the “perfect” moment or outcome can stall progress indefinitely. Instead, embrace a mindset of continuous improvement. Start with what you have, refine as you go, and avoid getting paralyzed by perfectionism.

Multitasking Myths

Contrary to popular belief, multitasking often reduces productivity and increases errors. Focusing on one task at a time typically leads to better results and faster completion.

Lack of Boundaries

Without clear boundaries between work and rest, burnout can set in quickly. Smart productivity includes recognizing the importance of breaks, downtime, and maintaining a healthy work-life balance.

Examples of Iconic Figures Who Are Smart and Get Things Done

Throughout history and in modern times, numerous individuals exemplify the blend of intelligence and effective action. People like Elon Musk, Oprah Winfrey, and Marie Curie didn't just have brilliant ideas—they executed relentlessly.

What sets these figures apart is their ability to harness their smarts, persist through challenges, and continuously deliver results. Their stories offer valuable lessons on the power of combining intellect with discipline and perseverance.

Learning From Their Habits

- Elon Musk's intense focus on first principles thinking helps him break down complex problems and innovate.
- Oprah Winfrey's emphasis on authenticity and communication builds trust and influence.
- Marie Curie's persistence and meticulous research demonstrate the importance of dedication.

Adopting even a fraction of these habits can help anyone become smarter and more effective in their endeavors.

Why Being Smart and Getting Things Done Matters More Than Ever

In an era defined by information overload and constant distractions, the ability to be smart and get things done is a competitive advantage. It enables individuals and organizations to innovate, adapt, and thrive. Employers seek team members who not only think critically but also execute efficiently. Entrepreneurs need to balance creativity with action to grow their ventures.

On a personal level, mastering this balance reduces stress and creates a sense of accomplishment. It fosters a mindset where challenges become opportunities and goals transform into achievements.

Being smart and getting things done isn't an innate trait reserved for a lucky few. It's a skill set that can be developed through intentional practice and self-awareness. By prioritizing wisely, managing your time effectively, and cultivating resilience, you can enhance your productivity and make a meaningful impact in all areas of your life.

Frequently Asked Questions

What does it mean to be 'smart and get things done' in a professional setting?

Being 'smart and getting things done' means effectively using your intelligence, skills, and resources to complete tasks efficiently and achieve goals without unnecessary delays.

How can I improve my ability to get things done smartly?

To improve, prioritize tasks, set clear goals, eliminate distractions, use tools like calendars and to-do lists, and continuously seek knowledge to work more efficiently.

Why is being smart alone not enough to succeed?

Being smart alone isn't enough because without action and execution, ideas remain unfulfilled. Combining intelligence with proactive effort ensures progress and success.

What are some habits of people who are smart and get things done?

They tend to plan ahead, focus on high-impact tasks, maintain discipline, adapt quickly to changes, and continuously learn to improve their effectiveness.

Can technology help in being smart and getting things done?

Yes, technology like productivity apps, project management tools, and automation can help streamline workflows, reduce manual effort, and enhance overall efficiency.

Smart and Gets Things Done: Unpacking the Traits of Effective Efficiency

smart and gets things done—this phrase encapsulates a quality highly sought after in professional and

personal contexts alike. It suggests not only intelligence but also the ability to translate ideas into action, bridging the gap between thought and execution. In today's fast-paced world, being smart alone is insufficient; the true mark of effectiveness lies in one's capacity to deliver results efficiently and reliably. This article delves into what it means to be smart and gets things done, exploring the characteristics, behavioral patterns, and strategic approaches that define such individuals and teams.

Defining “Smart and Gets Things Done” in Modern Contexts

The phrase “smart and gets things done” often conjures images of high achievers who combine sharp intellect with pragmatic action. However, its true meaning extends beyond mere intelligence and productivity. It encompasses emotional intelligence, decision-making under uncertainty, prioritization skills, and adaptability. In business environments, for example, this quality distinguishes leaders who not only devise innovative strategies but also mobilize resources effectively to implement them.

Moreover, being smart and getting things done involves a nuanced understanding of efficiency. It is not about rushing through tasks but maximizing output with minimal wasted effort. According to a 2023 survey by the Project Management Institute, teams that emphasize results-oriented behaviors see a 25% increase in project success rates compared to those focusing solely on planning stages. This statistic highlights the importance of coupling smart planning with action to achieve tangible outcomes.

Intelligence Beyond IQ: The Role of Practical Wisdom

Traditional measures of intelligence, such as IQ, provide limited insight into one's ability to execute tasks effectively. Instead, practical wisdom—or “phronesis,” as Aristotle described—is crucial. This form of intelligence involves sound judgment, contextual awareness, and the ability to navigate complex social and organizational dynamics.

Individuals who are smart and get things done often exhibit these traits:

- **Decisiveness:** They make informed decisions quickly, avoiding analysis paralysis.
- **Resourcefulness:** They leverage available tools and networks to overcome obstacles.
- **Resilience:** They persist in the face of setbacks, adapting strategies as needed.

These qualities enable them to maintain momentum and ensure that objectives are met, even when circumstances change unexpectedly.

Time Management and Prioritization: Keys to Getting Things Done

One of the hallmarks of people who are smart and get things done is their mastery of time management. They recognize that time is a finite resource and allocate it strategically to maximize impact. Techniques such as the Eisenhower Matrix, which categorizes tasks by urgency and importance, are often employed to focus on activities that drive results.

Additionally, productivity frameworks like Getting Things Done (GTD) emphasize breaking down complex projects into actionable steps. This systematic approach reduces overwhelm and facilitates steady progress. Studies have shown that individuals who integrate such methodologies into their routines report higher job satisfaction and lower stress levels, underscoring the practical benefits of effective time management.

The Interplay Between Technology and Productivity

In the digital age, being smart and getting things done increasingly involves leveraging technology to enhance efficiency. From project management software to AI-driven analytics tools, the right technology stack can transform how tasks are executed.

Leveraging Digital Tools to Enhance Execution

Smart individuals and organizations adopt tools that streamline workflows and improve communication. Platforms like Asana, Trello, or Microsoft Teams enable real-time collaboration and task tracking, reducing bottlenecks. Moreover, automation tools can handle repetitive tasks, freeing up cognitive resources for higher-level problem-solving.

However, an overreliance on technology without strategic intent can lead to distractions or inefficiencies. The key is discerning which tools align with specific goals and integrating them seamlessly into existing processes.

Balancing Analytical Thinking with Action Orientation

While data-driven decision-making is essential, those who get things done understand when to act decisively despite incomplete information. The concept of “analysis paralysis” describes scenarios where excessive deliberation hinders progress. Smart performers strike a balance by setting clear deadlines for decision points and embracing iterative improvements.

In agile project management, for example, teams deliver incremental value through sprints rather than waiting for perfect solutions. This approach embodies the principle of being smart and getting things done by valuing progress over perfection.

Attributes of People Who Are Smart and Get Things Done

Examining personality traits and habits reveals commonalities among individuals recognized for their effectiveness.

- **Goal-Oriented Mindset:** They define clear objectives and align efforts accordingly.
- **Strong Communication Skills:** They articulate ideas and delegate tasks efficiently.
- **Accountability:** They take ownership of outcomes, both successes and failures.
- **Continuous Learning:** They seek feedback and adapt based on new insights.
- **Emotional Regulation:** They maintain composure under pressure, enabling better decision-making.

These characteristics foster an environment where intelligence is harnessed productively, translating into measurable achievements.

Comparative Insight: Smart vs. Smart and Gets Things Done

It is instructive to contrast the concept of being “smart” in isolation with the composite quality of being “smart and gets things done.” Pure intellectual ability without execution often leads to missed opportunities. Conversely, those who focus solely on action without strategic insight may expend energy inefficiently.

For instance, a 2022 Harvard Business Review study found that executives rated as both highly intelligent and action-oriented outperformed peers by 30% in driving organizational growth. This synergy underscores the importance of integrating cognitive skills with execution capabilities.

Challenges and Pitfalls in Being Smart and Getting Things Done

While the ideal is compelling, there are inherent challenges in embodying this dual quality.

Risk of Burnout

A relentless drive to complete tasks can lead to overwork and stress, especially if boundaries are not maintained. Being smart and getting things done requires balancing productivity with well-being to sustain long-term performance.

Overemphasis on Efficiency at the Expense of Creativity

Focusing strictly on execution might discourage experimentation and innovation. Organizations must cultivate environments where smart thinking and diligent execution coexist with creative freedom.

Managing Expectations

Individuals known for getting things done may face pressure to consistently perform at high levels, which is not always feasible. Transparent communication about capacity and timelines is essential to maintain trust.

Strategies to Cultivate the Ability to Get Things Done Smartly

Developing this capability involves intentional practices:

1. **Set SMART Goals:** Specific, Measurable, Achievable, Relevant, and Time-bound objectives provide clarity.
2. **Adopt Prioritization Frameworks:** Methods such as the Pareto Principle help focus on high-impact tasks.
3. **Implement Reflective Practices:** Regular reviews enable course corrections and continuous improvement.
4. **Enhance Emotional Intelligence:** Building self-awareness and empathy improves collaboration and decision-making.
5. **Leverage Mentorship and Feedback:** Learning from others accelerates skill development.

These strategies empower individuals and teams to consistently deliver results while maintaining

intellectual rigor.

Throughout various industries and professional roles, the trait of being smart and getting things done continues to be a vital differentiator. It is the fusion of insight and action that drives progress, fosters innovation, and ultimately shapes success in a competitive landscape. By understanding and cultivating this dynamic, individuals and organizations can navigate complexity with agility and purpose.

Smart And Gets Things Done

smart and gets things done: Smart and Gets Things Done Avram Joel Spolsky, 2007-10-17 A guide to attracting, recruiting, interviewing, and hiring the best technical talent. A comprehensive system for hiring top-notch technical employees Packed with useful information and specific advice written in a breezy, humorous style Learn how to find great people—and get them to work for you—in an afternoon! The top software developers are ten times more productive than average developers. Ten times. You can't afford not to hire them. But if you haven't been reading Joel Spolsky's books or blog, you probably don't know how to find them and make them want to work for you. In this brief book, Joel reveals all his secrets—from his years at Microsoft, and as the co-founder of Fog Creek Software—for recruiting the best developers in the world. If you've ever wondered what you should be looking for in a resume, if you've ever struggled to decide whether to hire someone at the end of an interview, or if you're wondering why you can't find great programmers, stop everything and read this book.

smart and gets things done: SUMMARY - Smart And Gets Things Done: Joel Spolsky's Concise Guide To Finding The Best Technical Talent By Avram Joel Spolsky Shortcut Edition, 2021-06-18 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will discover how to recruit the best programmers for a Tech company. You will also discover that : in the IT industry, it is essential to have a quality workforce; a CV is no way to determine a candidate's worth; it is up to you to solicit the best profiles rather than waiting for them to come to you; interviews are central to the hiring process; to be successful, you need to create an attractive work environment and empower your employees. Finding talented employees is a major challenge for many companies. Their recruiters face a major challenge because their task depends on what the company has to offer, which is beyond their control. This is why managers and executives must reappropriate this activity, putting it truly at the heart of their strategy. Your employees are the source of your success: pamper them from the first contact and throughout your collaboration! *Buy now the summary of this book for the modest price of a cup of coffee!

smart and gets things done: Get Things Done Robert Kelsey, 2014-02-07 Robert Kelsey's What's Stopping You? has become a self-help classic. His What's Stopping You? books have helped thousands of people worldwide overcome their limiting beliefs and bash through their barriers to success. Now Robert is back to help us defeat the obstacles that stop us achieving more in our everyday lives. Many of us have the greatest of intentions but find ourselves procrastinating, which results in low attainment and frustrated ambitions. Grounded in solid psychological research Robert helps us examine why we might have these tendencies and how to overcome them in order to feel more together, in control and on-top of everything. Looks at the psychology behind why we procrastinate, in order to understand and change our behaviour, forming new, effective habits Provides practical solutions to help us 'get things done' in real life situations including meetings, on the phone, with e-mail, looking for a job and starting a business Includes techniques to improve focus and aid concentration Examines how disorganisation is not innate and how we can learn

processes that will allow us to be more effective How to bring control to certain areas of your life and reduce stress and uncertainty Get Things Done is emotional ergonomics for the organisationally-challenged individual – at home, at work, with themselves, and with others.

smart and gets things done: Joel on Software Avram Joel Spolsky, 2004-08-12 Joel Spolsky began his legendary web log, www.joelonsoftware.com, in March 2000, in order to offer insights for improving the world of programming. Spolsky based these observations on years of personal experience. The result just a handful of years later? Spolsky's technical knowledge, caustic wit, and extraordinary writing skills have earned him status as a programming guru! His blog has become renowned throughout the programming world now linked to more than 600 websites and translated into over 30 languages. Joel on Software covers every conceivable aspect of software programming—from the best way to write code, to the best way to design an office in which to write code! All programmers, all people who want to enhance their knowledge of programmers, and all who are trying to manage programmers will surely relate to Joel's musings.

smart and gets things done: Hello, Startup Yevgeniy Brikman, 2015-10-21 This book is the Hello, World tutorial for building products, technologies, and teams in a startup environment. It's based on the experiences of the author, Yevgeniy (Jim) Brikman, as well as interviews with programmers from some of the most successful startups of the last decade, including Google, Facebook, LinkedIn, Twitter, GitHub, Stripe, Instagram, AdMob, Pinterest, and many others. Hello, Startup is a practical, how-to guide that consists of three parts: Products, Technologies, and Teams. Although at its core, this is a book for programmers, by programmers, only Part II (Technologies) is significantly technical, while the rest should be accessible to technical and non-technical audiences alike. If you're at all interested in startups—whether you're a programmer at the beginning of your career, a seasoned developer bored with large company politics, or a manager looking to motivate your engineers—this book is for you.

smart and gets things done: All the Stars in the Sky Hubert E. Devine, 2024-01-31 It is 1950 in the seaport town of Yarmouth, Nova Scotia. Celeste Alexander, the daughter of a poor lobster poacher, dreams of something more than the life she leads cleaning the houses of her wealthy neighbours. When opportunity comes knocking, she leaps at the chance to take a waitressing job in the nearby town of Kentville, forever changing the arc of her life. Soon after arriving in Kentville to work at Sadie's Restaurant, she meets William Lockhart. An aspiring architect and admirer of Shakespeare, William sweeps her off her feet, and their romance blooms with first-love quickness and intensity. Though they have only been seeing each other for a few months, the lovers envision a future together. But Celeste's bright dreams of a happy life with William are cast under an ominous cloud when he joins the Princess Patricia's Canadian Light Infantry, a regiment of the Canadian army, hoping that a short stint in the military will help him further his career in the future. Celeste's worst fears are realized when William is sent off to fight in the Korean War, and she learns that she is pregnant with his child. Set against the backdrop of small-town Canada and the Korean War, this sweeping family saga gives voice with compelling sensitivity and grace to the cascading effects of loss and hardship across generations—and how hope, love, and the enduring power of family bonds can lift people up in the lowest moments of their lives.

smart and gets things done: The Procrastinator's Guide to Getting Things Done Monica Ramirez Basco, 2009-12-21 Everyone waits till the last minute sometimes. But many procrastinators pay a significant price, from poor job performance to stress, financial problems, and relationship conflicts. Fortunately, just as anyone can endlessly delay, anyone can learn how to stop! Cognitive-behavioral therapy expert Monica Ramirez Basco shows exactly how in this motivating guide. Dr. Basco peppers the book with easy-to-relate-to examples from recovering procrastinators—including herself. Inviting quizzes, exercises, and practical suggestions help you:

- *Understand why you procrastinate.
- *Start with small changes that lead to big improvements.
- *Outsmart your own delaying tactics.
- *Counteract self-doubt and perfectionism.
- *Build crucial skills for getting things done today.

smart and gets things done: Code For Your Life John Arundel, 2023-01-19 Where is your

career going? What are the secrets of finding a great job in tech, passing the interview, and working well in a development team? How can you plan and negotiate your promotions, pay rises, and contracts? How do you become a master of your technical craft? Does your future lie in management or on the staff engineer track? When is it time to launch your own business, and how can you succeed as an independent engineer? John Arundel is a software engineer, consultant, and writer with over four decades of experience in tech. In this practical, readable, and funny guide to software careers, he distills the lessons of many years into the ultimate guide for anyone who wants to succeed in tech. Based on interviews with dozens of successful tech professionals, and featuring hundreds of practical, actionable tips, *Code For Your Life* is a complete manual for your career. It'll show you how to get started, how to change jobs at the right time and for the right reason, and how to build a life you won't need a vacation from.

smart and gets things done: Global Problems, Smart Solutions Bjørn Lomborg, 2013-11-14 Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra \$75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case, 'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others.

smart and gets things done: Feel Smart About Christian Echavarria, 2007-06 “p>Building wealth is about managing our careers and the money we make. It all starts with the understanding that we build wealth primarily for two reasons: 1) to build prosperity and 2) to afford a comfortable retirement. Saving and investing to build prosperity is what we do to improve the quality and independence in our lives. Each of us measures quality and independence in our own terms-to some it means being able to afford big-ticket expenses, such as a dream home or supporting a favorite charity. To others it might mean making money work for us so that we don't have to work for it. We save and invest for retirement because, at some point in the future, we will choose to stop working and will need to replace the salary we currently earn. Saving and investing to afford a comfortable retirement is an obligation we have to ourselves. It is important to realize that we have no choice but to get on track saving and investing for retirement. We will be depending on it for survival in the later years of our life-considering how much longer people live with every passing decade, saving and investing is becoming increasingly more important.

smart and gets things done: Smart but Scattered--and Stalled Richard Guare, Colin Guare, Peg Dawson, 2019-01-15 Whether you're a young adult who is stalled on the journey to independence--or a concerned parent still sharing the family nest--this compassionate book is for you. Providing a fresh perspective on the causes of failure to launch, the expert authors present a 10-step plan that helps grown kids and parents work together to achieve liftoff. Learn why brain-based executive skills such as planning, organization, and time management are so important to success, and what you can do to strengthen them. You get downloadable practical tools for figuring out what areas to target, building skills, identifying a desired career path, and making a customized action plan. Vivid stories of other families navigating the same challenges (including father and son Richard and Colin Guare) reveal what kind of parental support is productive--and when to let go.

smart and gets things done: Pretty Smart Penny Pearlman, 2008-12 These former Miss Americas are not only pretty smart, but beautiful from the inside out. As they share their personal struggles and triumphs and the lessons they've learned, their stories will put a fire in your belly and fill you with hope.--Jacket

smart and gets things done: 301 Smart Answers to Tough Business Etiquette Questions
Vicky Oliver, 2010-10-06 As times change, so do norms of behavior in the office. 301 Smart Answers to Tough Business Etiquette Questions has the answers you need to survive daily life in the professional environment. Following the same popular Q&A format of her bestselling 301 Smart Answers to Tough Interview Questions, Oliver will tell you how to get the job and how to keep it by navigating all the intricacies of the modern workplace. Where other etiquette guides evoke images of a stilted and stuffy Victorian tea party, Oliver's witty answers to common questions are both engaging and accessible. She believes that etiquette is not a throwback to some bygone age, but has a direct and tangible impact on your career right here and now. Off come the white gloves as she tears away the corporate veil to reveal things they still don't teach at Harvard Business School, such as: Making a good first impression (and how to fix a bad one!) How to behave in elevators, airplanes, and supply closets Surviving cabs, commutes, and coffee shops Why time is not necessarily money everywhere on the planet Pre-approved conversational topics from A to Z Dining rules and regulations for the twenty-first century What to do when you are suddenly unemployed Electronic communication And much more! 301 Smart Answers to Tough Business Etiquette Questions will ensure that you know how to conduct yourself in every conceivable professional interaction.

smart and gets things done: Smart Data James A. George, James A. Rodger, 2010-03-25 The authors advocate attention to smart data strategy as an organizing element of enterprise performance optimization. They believe that "smart data" as a corporate priority could revolutionize government or commercial enterprise performance much like "six sigma" or "total quality" as organizing paradigms have done in the past. This revolution has not yet taken place because data historically resides in the province of the information resources organization. Solutions that render data smart are articulated in "technoid" terms versus the language of the board room. While books such as Adaptive Information by Pollock and Hodgson ably describe the current state of the art, their necessarily technical tone is not conducive to corporate or agency wide qualitative change.

smart and gets things done: Your Career Is a Masterpiece: Design with Purpose. Build with Courage. Live with Legacy Dr. Panneer Selvam Murugesan, 2025-08-24 Your Career Is a Masterpiece Design a Life of Clarity, Courage, and Meaningful Success What if your career wasn't just a path to follow, but a creative act of self-expression?
