youth business entrepreneurship program: *Youth Employment Programs* World Bank, 2012-12-17 In the first IEG evaluation of World Bank Group support to youth employment, the findings reveal short-term effects, limited positive results, and lack of evidence. youth business entrepreneurship program: *Youth Employment Programs in Ghana* Christabel Dadzie, Mawuko Fumey, Suleiman Namara, 2020-09-04 Unemployment and underemployment are global development challenges. The situation in Ghana is no different. In 2016, it was projected that, given the country's growing youth population, 300,000 new jobs would need to be created each year to absorb the increasing numbers of unemployed young people. Yet the employment structure of the Ghanaian economy has not changed much from several decades ago. Most jobs are low skill, requiring limited cognitive or technology know-how, reflected in low earnings and work of lower quality. An additional challenge for Ghana is the need to create access to an adequate number of high-quality, productive jobs. This report seeks to increase knowledge about Ghana's job landscape and youth employment programs to assist policy makers and key stakeholders in identifying ways to improve the effectiveness of these programs and strengthen coordination among major stakeholders. Focused, strategic, short- to medium-term and long-term responses are required to address current unemployment and underemployment challenges. Effective coordination and synergies among youth employment programs are needed to avoid duplication of effort while the country's economic structure transforms. Effective private sector participation in skills development and employment programs is recommended. The report posits interventions in five priority areas that are not new but could potentially make an impact through scaling up: (1) agriculture and agribusiness, (2) apprenticeship (skills training), (3) entrepreneurship, (4) high-yielding areas (renewable energy+solar, construction, tourism, sports, and green jobs), and (5) preemployment support services. Finally, with the fast-changing nature of work due to technology and artificial intelligence, Ghana needs to develop an education and training system that is versatile and helps young people to adapt and thrive in the twenty-first century world of work.

youth business entrepreneurship program: *The Young Entrepreneur's Edge* Jennifer Kushell, 1999 It seems like these days, whenever you look at a newsstand, at least one major business

magazine has a cover story about a wildly successful entrepreneur in his or her 20s or 30s. That's not surprising when one considers that one out of every five small-business owners in America is under 35, and that more young people are starting businesses than ever before. Right now, in college dorm rooms and their parents' garages, the next generation of Sam Waltons, Bill Gateses, and Michael Dells are hard at work. If you are ever going to take risks in exploring your career options, this is the absolute best time to do it, says 26-year-old entrepreneurial expert Jennifer Kushell. Why wait until you have a semi-stable corporate job and major financial obligations to discover that you hate your career and need to make a big change? Kushell is the ideal mentor for young people thinking about taking the plunge. Her very successful Young Entrepreneurs Network educates teens and twentysomethings in 40 countries about forming their own companies. A born entrepreneur -- her father and aunt are leading experts on franchising and trademark licensing, respectively -- Kushell presided over her own company's growth while attending college full-time. Her book draws on her invaluable hands-on experience: It's not so much a how-to-start-a-business book as it is a how-to-cope-with-life-while-starting-and-succeeding-in-your-own-business book, the author says. All I can say is that this is the real deal, the real story. With wit, candor and exuberance for her subject, Kushell gives practical and personal insight from a young entrepreneur's point of view to help new business owners get through their first few years. The book also teaches you tricks of the trade that you can rely on to compete successfully in a business world with people twice your age and companies God-knows-how-many-times-as big, she adds. The Young Entrepreneur's Edge addresses key topics such as trying to obtain capital and writing a business plan, which, the author says, are among the biggest obstacles for young entrepreneurs. But the book also tackles critical areas that other business books rarely address: how to get older people to take you seriously; how not to starve when you're broke; how to win your family's approval; how to get out and meet important people; how not to get carded when entertaining clients; and other unique situations faced by young business people. Praise for *The Young Entrepreneur's Edge* Fresh college graduates frustrated by the job search should pick up a copy of [this book]. --Los Angeles Times Can help both job-seekers and job-holders rethink their idea of gainful employment. --Mademoiselle Entertaining, fast-reading, and immensely sensible. Edited by leading scholars with deep regional expertise, the book addresses the cultural, institutional, religious and socio-economic dynamics shaping entrepreneurial activity in Arab countries. This book is designed for university students, educators, researchers, business support agencies, international aid agencies, and policy-makers working in or focused on supporting entrepreneurship in the Arab world. youth business entrepreneurship program: The Youth Amelia Khatri, AI, 2025-01-02 'The Youth' presents a comprehensive exploration of young people's evolving roles throughout human history, examining how different societies have shaped and responded to youth experiences from ancient times to the present day. The book weaves together archaeological evidence, historical documents, and contemporary research to demonstrate how youth has served as both a biological phase and a powerful catalyst for societal transformation across cultures and eras. Through carefully structured chapters, the work traces fascinating developments in youth history, from ancient coming-of-age rituals to medieval apprenticeships and modern educational systems. One particularly compelling aspect is the examination of youth movements, including the influential student protests of the 1960s and contemporary digital activism, showing how young people have consistently driven cultural and social change. The book's interdisciplinary approach combines traditional historical analysis with modern social science methodologies, offering readers a rich understanding of youth development patterns across different societies. The research stands out for its global perspective, examining both Western and non-Western approaches to youth development while acknowledging historical documentation limitations. Using accessible language and engaging case studies, the book connects historical patterns to current youth challenges, including unemployment, political engagement, and mental health issues. This makes it particularly valuable for educators, policy makers, and anyone interested in understanding how past approaches to youth development continue to influence contemporary debates and policies.

youth business entrepreneurship program: Enabling Agri-entrepreneurship and Innovation Catherine Chan, Brent S Sipes, Tina Lee, 2017-02-14 Agricultural entrepreneurs in conflict and post-conflict regions face special challenges; not just everyday personal risks, but also the difficulties of building small businesses when real or threatened violence can disrupt business growth cycles and economic security. Alongside establishing secure institutions, building a secure economy is rightly seen as the best way for conflict-torn regions to establish a peaceful future. But current agricultural entrepreneurship training and development starts from an assumption of peace, meaning that it is not always fit for purpose. The result is sub-optimal program design and inefficient use of resources. A product of a collaboration of experts in the fields of agri-business, agricultural marketing, and international development, this book gives officials and agencies developing entrepreneurship programs the practical real-life examples they need.

youth business entrepreneurship program: *Jobs for Shared Prosperity* Roberta Gatti, Matteo Morgandi, Rebekka Grun, Stefanie Brodmann, Juan Manuel Moreno, Daniela Marotta, Marc Schiffbauer, Elizabeth Mata Lorenzo, 2013-04-25 In the aftermath of the Arab Spring, when thousands of young women and men fought for the opportunity to realize their aspirations and potential, the question of jobs continues to be crucial in the Middle East and North Africa region. This report uses jobs as a lens to weave together the complex dynamics of employment creation, skills supply, and the institutional environment of labor markets. Consistent with the framework of the 2013 World Development Report on jobs, of which this report is the regional companion, this work goes beyond the traditional links between jobs, productivity, and living standards to include an understanding of how jobs matter for individual dignity and expectations—an aspect that was clearly central to the Arab Spring. Just as important, this report complements the economic perspective with an analysis of political economy equilibrium, with a view to identifying mechanisms that would trigger a reform process. As such, the report has three objectives: First, it seeks to provide an in-depth characterization of the dynamics of labor markets in the Middle East and North Africa and to analyze the barriers to the creation of more and better jobs. It does so by taking a cross-sectoral approach and identifying the distortions and incentives that the many actors—firms, governments, workers, students, education, and training systems—currently face, and which ultimately determine the equilibrium in labor markets. Second, the report proposes a medium term roadmap of policy options that could promote the robust and inclusive growth needed to tackle the structural employment challenge for the region. Third, the report aims to inform and open up a platform for debate on jobs among a broad set of stakeholders, with the ultimate goal of contributing to reach a shared view of the employment challenges and the reform path ahead.

youth business entrepreneurship program: *Youth Entrepreneurship and Local Development in Central and Eastern Europe* Bruno Dallago, 2017-11-30 This book analyses the opportunities and barriers for youth entrepreneurship amid systemic change in Central and Eastern Europe. The authors cover different aspects of youth entrepreneurship and its contribution to the debate on youth unemployment in transition economies. The book discusses the wide-spread over-optimism regarding youth entrepreneurship, self-employment, and its impact on economic innovation and job creation, resulting from a disregard of critical contextual features and the characteristics of young entrepreneurs themselves. The authors give due acknowledgment of the importance of both factors and so fully understand the impediments to youth entrepreneurship, especially in a transition context. Furthermore, they seek to assess the opportunities and constraints of promotion policies in transition economies. Most importantly, the book provides the first empirical contribution to youth entrepreneurship in Central and Eastern Europe by offering a representative number of case studies. The book will be invaluable reading for scholars and students of transition and developing countries, particularly those with an interest in entrepreneurship.
