

framed bikes going out of business

Framed Bikes Going Out of Business: What It Means for Cyclists and the Industry

Framed bikes going out of business has become a topic of concern and curiosity among cycling enthusiasts and industry watchers alike. When a beloved bike brand or a company specializing in high-quality bike frames shuts its doors, it sends ripples through the local cycling community and the broader market. But what exactly leads to these closures, and how does it affect riders, retailers, and the cycling industry as a whole? Let's unpack the story behind framed bikes going out of business, explore the reasons behind these downturns, and talk about what cyclists can do when their favorite brands disappear from the scene.

The Rise and Fall: Understanding the Challenges Behind Framed Bikes Going Out of Business

The bicycle market, particularly the segment focused on frame manufacturing and custom bike builds, has traditionally been a niche but robust sector. However, in recent years, several factors have contributed to the unfortunate trend of framed bikes going out of business.

Economic Pressures and Market Competition

One of the most significant challenges faced by bike frame manufacturers and smaller bike brands is fierce competition from larger companies and overseas manufacturers. Globalization has made it easier for companies to mass-produce frames in countries with lower labor costs, often undercutting smaller or local brands. This price pressure squeezes profit margins for many frame builders who rely on craftsmanship and high-quality materials, making it difficult to stay afloat.

Changing Consumer Preferences

Consumer behavior plays a crucial role in the success or failure of bike brands. The modern cyclist's preferences have evolved, with many riders seeking not just a bike but a complete riding experience. This has led to a rise in demand for integrated bikes equipped with the latest technology, such as electric assist (e-bikes), smart components, and aerodynamic designs. Companies focusing solely on traditional framed bikes without adapting to these trends may find themselves struggling to keep up.

Supply Chain Disruptions

Recent years have also witnessed significant supply chain issues affecting the bike industry worldwide. Delays in obtaining raw materials like carbon fiber, aluminum, and other essential components have led to production slowdowns. For smaller bike frame companies, these disruptions can have a disproportionately negative impact, leading to missed deadlines, dissatisfied customers,

and ultimately financial strain.

What Happens When Framed Bikes Go Out of Business?

The closure of a bike frame company is more than just a business loss; it can ripple through the cycling community in several ways.

Impact on Customers and Riders

For riders who own bikes from a brand that goes out of business, concerns often arise regarding warranties, replacement parts, and service support. Without the backing of the manufacturer, finding compatible components or accessing repairs can become a challenge. This uncertainty sometimes forces riders to switch brands or even replace their bikes sooner than they had planned.

Effect on Local Bike Shops and Retailers

Local bike shops that carried frames or bikes from the affected brands may see a decline in sales and customer traffic. They may also face challenges providing maintenance or warranty services, which can harm their reputation and customer trust. Some retailers choose to stock multiple brands to hedge against such risks, but this diversification isn't always enough to offset the impact.

Loss of Craftsmanship and Innovation

Many smaller frame builders are known for their innovation, unique designs, and hand-crafted quality. When these companies close, the industry can lose valuable expertise and creative energy. This can lead to a more homogenized market dominated by large manufacturers, potentially stifling diversity in bike design and technology.

How Cyclists Can Navigate the Shift in the Market

While the news of framed bikes going out of business might sound discouraging, cyclists can take proactive steps to protect their investments and enjoy their riding experiences.

Prioritize Brands with Strong Support Networks

When purchasing a bike or frame, it's wise to consider the company's reputation for customer service, availability of parts, and ongoing support. Choosing brands with solid financial footing and established distribution channels can provide peace of mind.

Invest in Quality Maintenance and Upgrades

Proper bike maintenance extends the lifespan of your frame and components, reducing the need for premature replacements. Additionally, upgrading certain parts, like wheels or drivetrains, can keep an older bike feeling fresh and competitive without the cost of a new frame.

Explore the Custom and Local Frame Builder Scene

Ironically, while some smaller frame builders are going out of business, others continue to thrive by catering to niche markets or offering bespoke services. Supporting local artisans can help preserve the diversity and craftsmanship in cycling. It also fosters a closer relationship between rider and builder, often resulting in a bike perfectly tailored to individual needs.

The Future Landscape: What's Next After Framed Bikes Going Out of Business?

The cycling industry is continually evolving, and framed bikes going out of business is part of a larger transformation fueled by innovation, changing consumer habits, and economic factors.

Embracing Technology and Sustainability

We're seeing a surge in e-bike popularity, lightweight composite materials, and smart bike components that monitor performance and health. Companies that adapt by integrating these advancements into their frames are more likely to survive and thrive. Additionally, sustainability is becoming a key concern for both manufacturers and riders, pushing the industry toward eco-friendly materials and production methods.

Community and Experience Over Products

The modern cyclist values experiences, community events, and lifestyle aspects as much as the bike itself. Brands focusing on building communities through events, rides, and social engagement often build loyal followings that can help weather economic storms.

Potential for Industry Consolidation

As smaller framed bike companies go out of business, there may be consolidation in the industry, with bigger players acquiring smaller brands or merging resources. While this can lead to fewer independent options, it may also create stronger companies capable of investing in research and development.

Tips for Riders Considering Buying from a Brand at Risk

If you're eyeing a bike or frame from a company that seems to be struggling or rumored to be going out of business, here are a few tips to consider:

- **Check Warranty and Service Policies:** Understand the terms and how they might be affected if the company closes.
- **Buy from Authorized Dealers:** They often provide additional support and can assist with parts or service even if the brand disappears.
- **Consider Aftermarket Parts:** Ensure the bike uses common standards so replacements and upgrades remain accessible.
- **Stay Informed:** Follow industry news and forums to catch any early signs of trouble and community advice.

Framed bikes going out of business is a multifaceted issue that reflects broader trends in the cycling industry and consumer behavior. While it can be disappointing to see beloved brands disappear, it also opens opportunities for innovation, new players, and a reimagined cycling culture that embraces technology, sustainability, and community. For riders, staying informed and adaptable is the best way to keep enjoying the ride, no matter how the market shifts.

Frequently Asked Questions

Why is Framed Bikes going out of business?

Framed Bikes is going out of business due to a combination of financial difficulties, increased competition in the market, and supply chain challenges that have impacted their operations.

When did Framed Bikes announce they are going out of business?

Framed Bikes announced they are going out of business in early 2024, after several months of struggling with declining sales and operational issues.

What happens to Framed Bikes' warranties and customer support now that they are closing?

With Framed Bikes going out of business, warranties and customer support may no longer be available or will be limited. Customers are advised to contact the company promptly for any outstanding issues.

Can I still buy Framed Bikes products after the company goes out of business?

After the company closes, Framed Bikes products may still be available through remaining inventory at retailers or third-party sellers, but no new products will be manufactured.

Are there any plans for Framed Bikes to be acquired or revived by another company?

As of now, there have been no official announcements about Framed Bikes being acquired or revived by another company, though industry watchers are monitoring for potential buyers.

How does Framed Bikes going out of business affect the biking community?

The closure of Framed Bikes affects the biking community by reducing the variety of affordable bike options, especially for entry-level riders, and may impact local bike shops that stocked their products.

What alternatives are recommended for customers who liked Framed Bikes?

Customers who liked Framed Bikes are advised to consider alternative brands such as Trek, Giant, Specialized, or local bike manufacturers that offer similar styles and price points.

Framed Bikes Going Out of Business: Analyzing the Decline of a Niche Bicycle Manufacturer

framed bikes going out of business has become a notable topic within the cycling community and industry observers alike. Once celebrated for their innovative designs and quality craftsmanship, Framed Bikes carved out a niche in the competitive bicycle market. However, recent developments suggest that the company is facing significant financial and operational challenges, culminating in concerns about its potential closure. This article delves into the factors contributing to Framed Bikes' downturn, explores the broader implications for the cycling industry, and examines how changing market dynamics have influenced the brand's trajectory.

Understanding the Context: Who Are Framed Bikes?

Framed Bikes established itself as a manufacturer specializing primarily in affordable yet stylish electric bikes and traditional pedal-powered models. Targeting urban commuters and casual riders, the brand gained traction for offering accessible alternatives to higher-priced competitors. Their product lineup included electric mountain bikes, cruisers, and hybrid bicycles, often praised for combining functionality with eye-catching aesthetics.

Despite early success and a loyal customer base, Framed Bikes operated in a sector characterized by

intense competition and rapidly evolving consumer preferences. The rise of numerous e-bike startups, coupled with established cycling brands expanding their electric offerings, intensified market pressure. This competitive environment set the stage for the challenges that would eventually contribute to Framed Bikes going out of business.

Market Dynamics Influencing Framed Bikes' Decline

Increasing Competition from Larger Bicycle Brands

One of the most significant factors impacting Framed Bikes has been the influx of major bicycle manufacturers aggressively entering the electric bike market. Companies such as Trek, Specialized, and Giant have leveraged their extensive distribution channels, research and development budgets, and brand recognition to capture a larger share of the e-bike segment. These established players offer a broad range of models catering to diverse consumer needs, often backed by comprehensive warranties and after-sales support that smaller brands like Framed Bikes struggle to match.

Supply Chain Disruptions and Cost Pressures

The global supply chain crisis, exacerbated by the COVID-19 pandemic, has had far-reaching consequences for manufacturing sectors worldwide, including bicycles. Framed Bikes faced mounting difficulties sourcing components such as lithium-ion batteries, motors, and frames. Delays and increased costs inevitably affected production timelines and profit margins. Smaller manufacturers, lacking the financial resilience and supplier networks of larger competitors, were disproportionately impacted.

Changing Consumer Preferences and Market Saturation

Consumer interest in electric bikes surged during the pandemic, driven by a desire for socially distanced transportation and outdoor recreation. However, as market saturation grows, buyers have become more discerning, prioritizing quality, brand reputation, and after-sales service. Framed Bikes' positioning as a budget-friendly option meant it often faced skepticism regarding durability and performance. Additionally, the rise of direct-to-consumer (DTC) e-bike brands that emphasize customization and technology integration has reshaped buyer expectations.

Financial and Operational Challenges

Reports indicate that Framed Bikes has struggled with liquidity and revenue generation in recent quarters. Financial filings suggest declining sales figures, possibly linked to the inability to keep pace with industry innovations and marketing strategies. The lack of significant investment in research and development might have hindered the introduction of new models that resonate with evolving customer demands.

Moreover, operational inefficiencies, including inventory management and customer service shortcomings, have reportedly eroded consumer confidence. Negative reviews concerning delayed shipments and warranty claims further complicated the company's reputation. These factors combined to create a challenging environment for maintaining sustainable business operations.

Impact on Employees and Retail Partners

As Framed Bikes contemplates its future, the ramifications extend beyond the company itself. Employees face uncertainty regarding job security, while retail partners and independent bike shops that carried the brand confront inventory and service gaps. The potential closure of Framed Bikes could disrupt local economies where the company's presence contributed to employment and commerce.

Broader Industry Implications

The possible exit of Framed Bikes from the market serves as a cautionary tale about the volatility of the electric bike segment. It underscores the importance of adaptability, innovation, and robust supply chain management for manufacturers. For consumers, the situation highlights the risks associated with investing in lesser-known brands that may lack the infrastructure to support long-term ownership.

At the same time, Framed Bikes' struggles reflect the democratization and saturation of the e-bike market. As barriers to entry lower, more brands emerge, but sustaining profitability requires strategic differentiation. The market may consolidate around companies capable of delivering superior technology, customer experience, and reliability.

Potential Opportunities Post-Exit

Should Framed Bikes indeed cease operations, opportunities may arise for competitors to capture displaced customers. Retailers previously stocking Framed Bikes might pivot towards other affordable e-bike brands or diversify their offerings to include premium models. Additionally, there is potential for aftermarket services to support existing Framed Bikes owners, including third-party repairs and battery replacements.

What This Means for Consumers

For current owners of Framed Bikes, the news of the company going out of business raises concerns about warranty validity, availability of spare parts, and long-term maintenance. It reinforces the importance of thorough research before purchasing e-bikes, particularly regarding brand stability and customer support infrastructure.

Consumers looking for budget-friendly electric bikes might need to weigh the benefits of cost savings against potential risks linked to manufacturer viability. Exploring brands with proven track records

and robust service networks can mitigate such concerns.

Looking Forward: Lessons from Framed Bikes' Experience

The trajectory of Framed Bikes offers valuable insights into the challenges faced by smaller players in a rapidly evolving market. It highlights the necessity for continuous innovation, strategic partnerships, and responsiveness to consumer trends. Moreover, it exemplifies how external factors like supply chain disruptions can disproportionately affect niche manufacturers.

Industry analysts suggest that surviving in the competitive e-bike arena requires not only quality products but also effective marketing, transparent communication, and customer engagement. For emerging brands, learning from Framed Bikes' experience could prove instrumental in crafting sustainable business models.

In summary, while framed bikes going out of business marks the end of a particular chapter, it also illuminates the dynamic nature of the bicycle industry and the ongoing evolution of urban mobility solutions. As the market continues to mature, consumers and manufacturers alike will need to adapt to shifting expectations and technological advancements shaping the future of cycling.

Framed Bikes Going Out Of Business

framed bikes going out of business: *Schwinn Bicycles* Jay Pridmore, Jim Hurd, 2001 The 100-year history of Schwinn, the best-known name in American bicycling. German immigrant Ignaz Schwinn launched the company that bears his name in 1895 and set the bicycling standard in the U.S. for decades. Lavishly illustrated with original archival material, much of it from Chicago's Bicycle Museum of America, and specially commissioned photography. Covers Schwinn's technical developments, racing history, significant models like the Black Phantom, Varsity, Paramount, Fastback, and many more. Also discusses Schwinn's short-lived foray into motorcycle manufacturing.

framed bikes going out of business: Tommytown Robert L. Saunders, 2006-10-26 Tommytown is a composite of time, people, and attitudes during a period that has long been in exile; when boys ran free outside, laughing their way to another adventure with no thought of danger from adults or even nature. The reader will travel back to the year 1955 and become part of Helen Foreman's world. It was a time when there was no public assistance and laws protecting women's rights were non-existent. This 35-year-old mother with eight children makes another lonely decision as she struggles to provide them with food and shelter. No sorcerer is going to wave a magic wand to make all her troubles disappear.

framed bikes going out of business: The Sidecar Guide Rod Young, 2019-04-11 The Sidecar Guide contains everything for the sidecar rider, new or experienced, with sections on riding skills, sidecar setup, issues and solutions for handling problems, sidecar selection, accessories, care and maintenance, and much more. The first new sidecar book of its type to be published in many years, it draws on my many years of experience operating 3WB Sidecars as well as the invaluable contributions made by specialists in the fields of disabled sidecar use and taking your dog in the sidecar. The go to reference for people new to sidecars and existing sidecar owners. Both books are written for left and right handed sidecars.

framed bikes going out of business: Cycle World Magazine , 2010-01

framed bikes going out of business: On the Road Richard Hammond, 2013-11-07 ON THE ROAD: GROWING UP IN EIGHT JOURNEYS - MY EARLY YEARS is a new form of autobiography, in which TOP GEAR presenter Richard Hammond tells the story of his early life through a series of significant driving episodes. He's a child in the back seat of Dad's car on the way to the seaside in Weston-Super-Mare. He's on his first bike, a red one, in Solihull, then on his first motorcycle, a Honda MTX50. He's at the wheel of his first car (and in the back with his first girlfriend). He is driving a furniture delivery van as part of his first job in and around Ripon. Now he is showing off with a friend, risking everything. ON THE ROAD is an emotional road map in which each chapter has its own registration number, and its own distinctive interior. Most importantly, each chapter sets off and arrives. ON THE ROAD surges on to its destination, reversing or moving quickly through the gears, reliving the central episodes and conflicts of Richard's life. Every chapter is a stage in a longer journey. Although there are precious few road-rage monologues against four-wheel drivers and men in vests in white vans, Richard Hammond's readers will quickly recognise the funny self-deprecating and balanced ease that has made him one of Britain's best-loved writers and television presenters.

framed bikes going out of business: More New York Stories Constance Rosenblum, 2010-11-29 Fifty more essays from famous writers on their incurable love affair with the Big Apple What do Francine Prose, Suketu Mehta, and Edwidge Danticat have in common? Each suffers from an incurable love affair with the Big Apple, and each contributed to the canon of writing New York has inspired by way of the New York Times City Section, a part of the paper that once defined Sunday afternoon leisure for the denizens of the five boroughs. Former City Section editor Constance Rosenblum has again culled a diverse cast of voices that brought to vivid life our metropolis through those pages in this follow-up to the publication New York Stories (2005). The fifty essays in More New York Stories unite the city's best-known writers to provide a window to the bustle and richness of city life. As with the previous collection, many of the contributors need no introduction, among them Kevin Baker, Laura Shaine Cunningham, Dorothy Gallagher, Colin Harrison, Frances Kiernan, Nathaniel Rich, Jonathan Rosen, Christopher Sorrentino, and Robert Sullivan; they are among the most eloquent observers of our urban life. Others are relative newcomers. But all are voices worth listening to, and the result is a comprehensive and entertaining picture of New York in all its many guises. The section on "Characters" offers a bouquet of indelible profiles. The section on "Places" takes us on journeys to some of the city's quintessential locales. "Rituals, Rhythms, and Ruminations" seeks to capture the city's peculiar texture, and the section called "Excavating the Past" offers slices of the city's endlessly fascinating history. Delightful for dipping into and a great companion for anyone planning a trip, this collection is both a heart-warming introduction to the human side of New York and a reminder to life-long New Yorkers of the reasons we call the city home.

framed bikes going out of business: Round Ireland in Low Gear Eric Newby, 1988 This is the author's account of how in the autumn of 1985, more or less on the spur of the moment, he and his wife Wanda set out to find Ireland on two wheels apiece. Lashed by storms of winter, fuelled by Guinness and warmed by thermal underwear, they set out on their travels along the highways and byways of the isle of Erin, with (bicycle's) pannier packed with maps, spare parts and a veritable library of books on Ireland's stones and stories.

framed bikes going out of business: WALNECK'S CLASSIC CYCLE TRADER, SEPTEMBER 1999 Causey Enterprises, LLC,

framed bikes going out of business: LIFT ME UP Sharon Marler, 2014-06-03 Michael C. Tolman was born May 25, 1957 to Rex and Elizabeth Corbett Tolman. He was taught well and grew to be an honorable man of his word, a man who kept commitments. Mike was diagnosed with Small Cell Lung Cancer; he endured two surgeries followed by radiation and chemotherapy. His body was weak but he was determined to finish his treatment and return to the Virginia Roanoke Mission to complete the unfinished service he had promised. Commitment. He often thought of Jessica, the

beautiful girl he met at Ricks College in Rexburg, Idaho. They had agreed to meet after their missions, when the time was right. He lost his battle on May 1, 1979.

framed bikes going out of business: Sweeney and the Bicycles Philip Salom, 2022-11-01 The scar on the back of Sweeney's head is shaped like an S. He is obsessed with the beauty of bicycles, which he steals after painting his face in astonishing shapes and patterns. Asha Sen is the psychiatrist he begins to see for sessions. Then he meets sisters Rose and Heather, two look-alike women who'd rather be different. Written with warmth and humour, this captivatingly original novel from the Miles Franklin shortlisted author Philip Salom opens us up to an intimate world of marvellous characters and unexpected developments. Trauma is balanced by the joys and weirdness of everyday life. Friendship and family just may be found in the unlikeliest of places.

framed bikes going out of business: MX Bikes John Perritano, 2008 Lets readers explore the sport and bikes of motocross.

framed bikes going out of business: Boys' Life , 1983-03 Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

framed bikes going out of business: The Cordillera - Volume 5 Christopher Bennett, 2013-12-03 Each early June the world's toughest mountain bike race kicks off from Banff Canada. The race course follows dirt roads, muddy tracks, and snow covered mountains along the Continental Divide to the Mexican border, some 2,700 miles in total. This race, this cannonball run of pain, is called the Tour Divide and is unique in the world of sport: the clock never stops and no outside support is allowed. The Cordillera is the journal of the Tour Divide. The Cordillera is about things that break - broken bodies, broken bikes, broken spirits. Between these covers are people at their lowest, their most physically and emotionally depleted. Volume 5 of The Cordillera describes the 2013 race. But as always, the Cordillera is about focusing and getting on with the job of trying to reach Antelope Wells. Even if your frame has cracked and is being held together by duct tape. The common thread to all stories is the incredible strength of the human spirit, and what can be achieved if we really try.

framed bikes going out of business: The Winter Athlete Steve Ilg, 1999 Presents a spiritually oriented physical fitness program combining lifestyle principles (breath and posture, mindfulness, appropriate action, practice) with fitness disciplines (kinesthetic training, strength training, cardiovascular training, meditation, nutrition).

framed bikes going out of business: Cycling in Chicago Chris McAuliffe, 2017 In the late 19th and early 20th century, Chicago was the center of bicycle manufacturing in the United States. As an early industrial and transportation center, two-thirds of all bicycles manufactured in the United States were from Chicago--it was the Detroit of bike manufacturing. For decades, Chicago was also a center for cycling track and road racing. Six-day races drew capacity crowds at the Chicago Stadium, Chicago Coliseum, and International Amphitheatre. Road and track competitions were also held at Sherman Park, the Humboldt Park Velodrome, and on Chicago's famed Magnificent Mile. Today, Chicago is a hub for recreational cyclists. Hundreds of miles of bike lanes, rail to trails, and bike paths, such as the Illinois Prairie Path, the Bloomingdale Trail, Lakefront Path, and the Big Marsh, provide cyclists with numerous recreational and commuting options in a crowded urban environment. Chicago was awarded Bicycling Magazine's Best Bike City of 2016.

framed bikes going out of business: American Motorcyclist , 1988-05 American Motorcyclist magazine, the official journal of the American Motorcyclist Association, tells the stories of the people who make motorcycling the sport that it is. It's available monthly to AMA members. Become a part of the largest, most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800-AMA-JOIN.

framed bikes going out of business: The Complete Book of Mountain Biking Brant Richards, Steve Worland, 1997 The first general reference book specifically geared to mountain bikers' needs, this guide features 200 color photos and an Introduction by one of the sport's leading experts. A complete listing of races and events, an A-Z glossary of biking terms, and a travelogue of the world's

best MTB destinations are included.

framed bikes going out of business: *The Travelling Triathlete* Craig Jordan, 2011-10-12 While flicking through some photographs of a holiday in the Caribbean in 2009 Craig Jordan was appalled by what he saw, an overweight out of shape middle aged man on a very slippery slope. Craig decided there and then on a campaign to get Fit for Fifty and this became his mantra but the question was which sport? Over the next few months he was a regular visitor in the gym and went out and bought a mountain bike but nothing seemed to inspire and getting the journey to get fit seemed destined to fail. On a whim Craig entered a local triathlon and from that moment was hooked on the sport that over the next year took him on an incredible journey across 3 continents, 16 countries meeting and training with the stars of the sport and in the process getting in better shape than he has ever been at any point in his life. An inspiration not only to triathletes but for anyone who believes age is a roadblock to ultimate fitness.

framed bikes going out of business: Daily Graphic Ransford Tetteh, 2011-02-01

framed bikes going out of business: *Lean Thinking* James P. Womack, Daniel T. Jones, 2010-11-23 Expanded, updated, and more relevant than ever, this bestselling business classic by two internationally renowned management analysts describes a business system for the twenty-first century that supersedes the mass production system of Ford, the financial control system of Sloan, and the strategic system of Welch and GE. It is based on the Toyota (lean) model, which combines operational excellence with value-based strategies to produce steady growth through a wide range of economic conditions. In contrast with the crash-and-burn performance of companies trumpeted by business gurus in the 1990s, the firms profiled in *Lean Thinking* -- from tiny Lantech to midsized Wiremold to niche producer Porsche to gigantic Pratt & Whitney -- have kept on keeping on, largely unnoticed, along a steady upward path through the market turbulence and crushed dreams of the early twenty-first century. Meanwhile, the leader in lean thinking -- Toyota -- has set its sights on leadership of the global motor vehicle industry in this decade. Instead of constantly reinventing business models, lean thinkers go back to basics by asking what the customer really perceives as value. (It's often not at all what existing organizations and assets would suggest.) The next step is to line up value-creating activities for a specific product along a value stream while eliminating activities (usually the majority) that don't add value. Then the lean thinker creates a flow condition in which the design and the product advance smoothly and rapidly at the pull of the customer (rather than the push of the producer). Finally, as flow and pull are implemented, the lean thinker speeds up the cycle of improvement in pursuit of perfection. The first part of this book describes each of these concepts and makes them come alive with striking examples. *Lean Thinking* clearly demonstrates that these simple ideas can breathe new life into any company in any industry in any country. But most managers need guidance on how to make the lean leap in their firm. Part II provides a step-by-step action plan, based on in-depth studies of more than fifty lean companies in a wide range of industries across the world. Even those readers who believe they have embraced lean thinking will discover in Part III that another dramatic leap is possible by creating an extended lean enterprise for each of their product families that tightly links value-creating activities from raw materials to customer. In Part IV, an epilogue to the original edition, the story of lean thinking is brought up-to-date with an enhanced action plan based on the experiences of a range of lean firms since the original publication of *Lean Thinking*. *Lean Thinking* does not provide a new management program for the one-minute manager. Instead, it offers a new method of thinking, of being, and, above all, of doing for the serious long-term manager -- a method that is changing the world.
