Understanding the Context: The Great Depression and the Need for the New Deal

Before diving into the worksheet answers, it's essential to grasp the historical backdrop. The Great Depression, which began with the stock market crash of 1929, devastated the American economy. Unemployment soared, banks failed, and millions faced poverty. This crisis set the stage for Franklin D. Roosevelt's New Deal, a series of programs aimed at economic recovery and reform.

The New Deal sought to provide relief for the unemployed, recovery for the economy, and reform to prevent future depressions. Many of the worksheet questions revolve around these three goals, making it crucial to understand this framework.

Key Themes in the New Deal Crash Course Worksheet

The worksheet typically focuses on several major themes:

- The causes and effects of the Great Depression
- Roosevelt's approach to tackling economic hardship
- Major New Deal programs and agencies

By keeping these themes in mind, answering the worksheet questions becomes more straightforward and meaningful.

Breaking Down the New Deal Crash Course US History 34 Worksheet Answers

Now, let's walk through some common questions you'll likely encounter and provide well-explained answers that align with the Crash Course content.

1. What were the main causes of the Great Depression?

The Great Depression was the result of multiple factors:

- Stock Market Speculation: Many investors bought stocks on margin, inflating prices artificially.
- Banking Failures: Banks made risky loans and suffered runs, leading to closures.
- Overproduction: Factories and farms produced more goods than could be consumed.
- Unequal Wealth Distribution: The wealth gap limited consumer spending.
- Decline in International Trade: Tariffs like the Smoot-Hawley Tariff reduced global trade.

These causes combined created a domino effect that plunged the country into economic turmoil.

2. How did Franklin D. Roosevelt's approach differ from that of his predecessor?

Unlike Herbert Hoover, who believed in limited government intervention and voluntary cooperation from businesses, Roosevelt embraced a more active federal role. His New Deal policies expanded government power to directly address unemployment, provide social welfare, and regulate the economy. Programs like the CCC (Civilian Conservation Corps) and WPA (Works Progress Administration) put people to work, while agencies like the SEC (Securities and Exchange Commission) reformed financial markets.

3. What are some key New Deal programs, and what did they aim to accomplish?

Several programs stand out for their scale and impact:

- **CCC (Civilian Conservation Corps):** Employed young men in conservation projects.
- **WPA (Works Progress Administration):** Created jobs in public works like roads, schools, and arts.
- **Social Security Act:** Established pensions and unemployment insurance.
- **FDIC (Federal Deposit Insurance Corporation):** Insured bank deposits to restore trust.
- **AAA (Agricultural Adjustment Act):** Aimed to raise farm prices by limiting production.

Each program targeted specific problems like unemployment, poverty, or financial instability.

4. Why was the New Deal controversial?

While many Americans benefited from New Deal programs, critics argued it expanded federal power too much, threatening individual freedoms and free-market principles. Business leaders often opposed regulations, while some conservatives saw it as a step toward socialism. Additionally, the New Deal did not fully solve the economic crisis, leading some to question its effectiveness.

5. How did the New Deal change the relationship between the American government and its citizens?

The New Deal fundamentally reshaped expectations of government responsibility. It established the idea that the federal government should play a role in ensuring economic stability and social welfare. This shift laid the groundwork for the modern welfare state and increased government involvement in everyday life.
