Various themes are apparent throughout each of the chapters in this volume: the range of sexual experience and expression that exists across individuals; a recognition of our society's responses to expressions of sexuality, including the social, attitudinal, and cultural barriers that inhibit the expression of healthy sexuality and that constrain our approaches to assisting individuals with their recovery from trauma; the need to consistently and painstakingly examine our own assumptions relating to sexuality in order to be more effective with our clients; and the delicate balance that is often required when working with clients around issues of sexuality in the context of institutions, community, and societal structures.

regis university psychology masters: Disseminating Behavioral Research Annette K. Griffith, Tyler C. Ré, 2023-12-09 Dissemination is a key component of the research process. While several fields have developed resources dedicated to training and supporting their scientists and practitioners as they are encouraged to disseminate within their fields and to the larger public audience, there has been a lack of formal guidance for dissemination within the behavioral sciences. Disseminating Behavioral Science aims to fill that gap, providing guidance across modalities for topics ranging from the peer-review process to conference presentation to nontraditional avenues for dissemination. The contents of this edited text, divided across six sections, serves as a roadmap for students, junior researchers, and senior scholars. The first section includes types of academic scholarship, types of dissemination, and strategies to ensure ethical dissemination. The second reviews traditional publication preparation, including tips for the writing process and key components to include in each section of a scientific manuscript. Section Three explores publication within a traditional peer reviewed journal. Section Four outlines additional strategies to get research publicly recognized through conference presentations, social media and popular media sources, and white and grey literature. Sections Five and Six offer a consolidated glossary of all key terms in the text and combined reference list.
