imperialism word search answers key: Formation of Periodical Authorship in 1920s Korea

Jae-Yon Lee, 2023-06-06 Formation of Periodical Authorship in 1920s Korea argues that Korean authors who entered the literary scene during modern literature's formative years were the subject mediated by periodicals. However, it has been difficult to substantiate this statement because periodicals, including magazines, were open to different groups of writers; various social, literary, religious, and cultural discourses; and dissimilar genres. The multi-level interactions between terms, knowledge, and writing styles in circulation unfolded at a larger scale at some times, and at other times in such an ordinary manner that one can hardly identify and synthesize them to make any sense. Employing not only conventional close reading, but also modes of distant reading developing out of cultural analytics, Lee investigates the specific ways in which patterns of social, semantic, and stylistic interactions in Korea's major magazines configured three kinds of authorship, namely the "narcissistic author," the "prophetic critic," and the "everyday reviewer." He rereads artist stories, leftist social discourses, religious cosmology, and joint reviews through quantitative analyses and offers an engaging account on the importance of repetitions in creating literary originality. This book extends periodical studies through cultural analytics and opens up a new horizon for the next generation of literary scholars seeking innovative experiments in a digital age.

From a distinguished author in the field, *The New Global History* is a critical inquiry into the historical process of globalization, which is seen as a distinctly twentieth century phenomenon with its roots in the age of expansion of the early modern world. Cutting across disciplinary boundaries, *The New Global History* offers a fresh, overarching view of the process of globalization that is always empirically based and discusses the most important themes, such as policy, trade, cultural imperialism and warfare. imperialism word search answers key: *The Oxford History of Anglicanism* Anthony Milton, Jeremy Gregory, Rowan Strong, William L. Sachs, Jeremy Morris, 2017 The Oxford History of Anglicanism provides a global study of Anglicanism from the sixteenth century to the twenty-first. The five volumes in the series look at how Anglican identity was constructed and contested since the English Reformation of the sixteenth century, and examine its historical influence during the past six centuries. They consider not only the ecclesiastical and theological aspects of global Anglicanism, but also the political, social, economic, and cultural influences of this form of Christianity that has been historically significant in Western culture, and a burgeoning force in non-Western societies since the nineteenth century. Written by international experts in their various historical fields, each volume analyses the varieties of Anglicanism that have emerged. The series also highlights the formal, political, institutional, and ecclesiastical forces that have shaped a global Anglicanism; and the interaction of Anglicanism with informal and external influences which have both moulded Anglicanism and been fashioned by it. Volume five of The Oxford History of Anglicanism considers the global experience of the Church of England in mission and in the transitions of its mission Churches towards autonomy in the twentieth century. The Church developed institutionally, yet more than the institutional history of the Church of England and its spheres of influence is probed. The contributors focus on what it has meant to be Anglican in diverse contexts. What spread from England was not simply a religious institution but the religious tradition it intended to implant. The volume addresses questions of the conduct of mission, its intended and unintended consequences. It offers important insights on what decolonization meant for Anglicans as the mission Church in various global locations became self-reliant. This study breaks new ground in describing the emergence of an Anglicanism shaped more contextually than externally. It illustrates how Anglicanism became enculturated across a broad swath of cultural contexts. The influence of context, and the challenge of adaption to it, framed Anglicanism's twentieth-century experience.
