

19d osut training schedule

****Understanding the 19D OSUT Training Schedule: A Complete Guide****

19d osut training schedule is a critical roadmap for soldiers preparing to become cavalry scouts in the U.S. Army. This training pathway combines both Basic Combat Training (BCT) and Advanced Individual Training (AIT) into one seamless program, designed to equip trainees with the skills, knowledge, and discipline necessary to excel in reconnaissance and security operations. If you're considering or preparing for 19D MOS (Military Occupational Specialty), understanding the structure and demands of this training schedule will help you approach it with confidence and clarity.

What is the 19D OSUT Training Schedule?

The 19D OSUT (One Station Unit Training) is a unique training program that merges the initial phase of military training with specialized cavalry scout instruction. This schedule typically spans approximately 16 weeks and takes place primarily at Fort Benning, Georgia. Unlike separate BCT and AIT programs, OSUT allows soldiers to stay with the same unit and cadre throughout their training, fostering stronger camaraderie and a more focused learning environment.

The training schedule is carefully structured to build physical endurance, tactical understanding, and practical skills. Trainees start with foundational military skills before progressing to the technical and tactical aspects of cavalry scouting. The combination of classroom instruction, field exercises, and physical training is intense but designed to prepare soldiers for real-world reconnaissance missions.

Basic Combat Training Phase

The initial weeks of the 19D OSUT training schedule focus on Basic Combat Training fundamentals. During this time, soldiers learn essential skills such as:

- Physical fitness and endurance building
- Basic marksmanship and weapons handling
- Military customs, courtesies, and discipline
- Land navigation and map reading
- First aid and battlefield casualty care

This phase serves to transform civilians into soldiers by instilling discipline, teamwork, and a warrior mindset. Physical training is rigorous, with daily runs, obstacle courses, and strength conditioning exercises that

prepare trainees for the demanding nature of cavalry scout duties.

Advanced Individual Training Phase

Once the basic soldiering skills are established, the schedule shifts to the advanced training specific to cavalry scouts. This portion covers a wide range of topics including:

- Reconnaissance and surveillance techniques
- Operation and maintenance of scout vehicles such as the Bradley Fighting Vehicle
- Tactical communication and reporting
- Enemy engagement and security operations
- Use of advanced weaponry and equipment

Trainees spend significant time in the field, conducting simulated missions to practice scouting, target identification, and intelligence gathering. The training emphasizes quick decision-making, stealth, and adaptability, all crucial traits for a successful 19D cavalry scout.

Daily Life and Physical Demands of the 19D OSUT Training Schedule

Understanding the daily routine helps trainees mentally prepare for what lies ahead. A typical day in the 19d osut training schedule is long and physically taxing, often starting before sunrise and ending after sunset. Physical fitness remains a cornerstone, with sessions including running, calisthenics, and strength training.

Meals are scheduled but brief, as the focus is on maximizing training time. Trainees must manage their time efficiently to complete tasks such as cleaning weapons, maintaining gear, and studying tactics. The living conditions are communal and disciplined, fostering teamwork and mutual responsibility.

The physical demands require consistent effort and mental toughness. Many trainees find that staying hydrated, getting adequate rest when possible, and maintaining a positive mindset are essential strategies for success.

Tips for Thriving During the 19D OSUT Training Schedule

- ****Prioritize physical fitness before arrival:**** Coming prepared with a solid fitness base reduces the shock of training intensity.

- ****Stay organized:**** Keeping gear and paperwork in order helps avoid unnecessary stress.
- ****Ask questions:**** Instructors are there to help; understanding tasks fully can improve performance.
- ****Lean on your peers:**** Building strong bonds with fellow trainees can provide emotional support during tough moments.
- ****Maintain good nutrition and hydration:**** Fueling the body properly aids in recovery and endurance.

Common Challenges and How the 19D OSUT Training Schedule Addresses Them

The demanding nature of the 19d osut training schedule can present several challenges, including physical exhaustion, mental stress, and the pressure to quickly master complex skills. However, the training curriculum is designed to progressively build capability and resilience.

One common hurdle is adapting to the tactical mindset required for reconnaissance missions. Unlike traditional infantry roles, cavalry scouts must excel in observation, stealth, and intelligence gathering. The schedule incorporates numerous practical exercises to develop these skills gradually, supported by classroom lessons and hands-on training.

Another challenge is mastering vehicle operation and maintenance. Since cavalry scouts often operate Bradley Fighting Vehicles, trainees receive comprehensive instruction on driving, navigation, and troubleshooting. This hands-on approach ensures soldiers are confident and competent behind the controls.

The Role of Instructors and Mentorship

Throughout the 19D OSUT training schedule, instructors play a vital role not only in teaching technical skills but also in mentoring soldiers. They provide feedback, encouragement, and discipline to help trainees reach their full potential. The consistent presence of cadre members within the same unit allows for personalized guidance and a deeper understanding of each soldier's strengths and areas for improvement.

Preparing for Life After 19D OSUT

Completing the 19d osut training schedule is just the beginning of a cavalry scout's military career. The training provides the foundation necessary for success in active duty assignments, which often involve reconnaissance patrols, security operations, and intelligence missions in various

environments.

Newly trained scouts will find themselves operating as part of a team, relying heavily on the skills and discipline developed during OSUT. The schedule's emphasis on real-world scenarios helps ease the transition into operational units, where adaptability and quick thinking are essential.

Soldiers are also encouraged to continue physical training and professional development throughout their careers to maintain readiness and advance within the cavalry branch.

Continuing Education and Advanced Training Opportunities

After completing the 19D OSUT training schedule, many soldiers pursue additional courses such as Airborne School, Ranger School, or specialized reconnaissance training. These opportunities build on the foundation laid during OSUT and expand a soldier's capabilities and career prospects.

Leadership development is another avenue, with experienced scouts moving into squad leader or platoon leader positions, responsible for guiding new soldiers through similar training and missions.

Whether you're just beginning your journey or looking to understand what lies ahead, the 19d osut training schedule offers a comprehensive and challenging pathway to becoming a skilled cavalry scout. Its blend of physical conditioning, technical instruction, and tactical training ensures soldiers are well-prepared to meet the demands of this vital role in the U.S. Army.

Frequently Asked Questions

What is the typical duration of the 19D OSUT training schedule?

The 19D OSUT (One Station Unit Training) typically lasts about 16 weeks, combining both Basic Combat Training and Advanced Individual Training for Cavalry Scouts.

What are the main phases of the 19D OSUT training schedule?

The 19D OSUT training schedule is divided into Basic Combat Training (BCT), which lasts approximately 10 weeks, followed by Advanced Individual Training

(AIT) for Cavalry Scouts, lasting about 6 weeks.

What physical fitness standards are expected during the 19D OSUT training schedule?

Recruits must meet Army physical fitness standards, including passing the Army Physical Fitness Test (APFT) with events like push-ups, sit-ups, and a 2-mile run, with increasing intensity throughout the 19D OSUT schedule.

How is weapons training incorporated into the 19D OSUT schedule?

Weapons training is a critical part of the 19D OSUT schedule and includes extensive instruction and qualification on the M4 rifle, M240 machine gun, and other weapon systems used by Cavalry Scouts.

Are there field training exercises in the 19D OSUT schedule?

Yes, the 19D OSUT schedule includes multiple field training exercises (FTXs) where recruits apply their skills in simulated combat scenarios to prepare for real-world missions.

When do recruits learn reconnaissance and surveillance skills in the 19D OSUT training?

Reconnaissance and surveillance skills are primarily taught during the Advanced Individual Training phase, which is part of the 19D OSUT schedule, focusing on Cavalry Scout-specific missions.

Does the 19D OSUT training schedule include leadership development?

Yes, leadership development is integrated throughout the 19D OSUT schedule to prepare Cavalry Scouts to operate effectively in small teams and lead when necessary.

What is the daily routine like during the 19D OSUT training schedule?

The daily routine during 19D OSUT is rigorous, typically starting early with physical training, followed by classroom instruction, hands-on exercises, weapons training, and fieldwork, lasting up to 12-14 hours a day.

Are there any written tests during the 19D OSUT training schedule?

Yes, recruits undergo various written tests throughout the 19D OSUT schedule to assess their knowledge of military tactics, weapons, reconnaissance techniques, and Army regulations.

How does the 19D OSUT training schedule prepare soldiers for their first assignment?

The 19D OSUT training schedule equips soldiers with the necessary combat skills, fieldcraft, weapons proficiency, and tactical knowledge to perform effectively as Cavalry Scouts immediately upon arrival at their first unit.

Additional Resources

19d OSUT Training Schedule: A Detailed Examination of the Army's Infantry Training Pipeline

19d osut training schedule represents a critical pathway for soldiers aspiring to become infantrymen in the U.S. Army. This training regimen, known formally as One Station Unit Training (OSUT) for the 19D Cavalry Scout Military Occupational Specialty (MOS), combines Basic Combat Training (BCT) and Advanced Individual Training (AIT) into a streamlined, approximately 14-week program. Understanding the structure, demands, and nuances of the 19d OSUT training schedule is essential for prospective trainees, military enthusiasts, and those interested in the Army's infantry training system.

Overview of the 19D OSUT Training Schedule

The 19d OSUT training schedule is designed to take recruits from civilians to fully qualified Cavalry Scouts, capable of performing reconnaissance and security operations on the battlefield. Unlike traditional training models that separate BCT and AIT, OSUT merges these two phases to provide a continuous learning experience with the same drill sergeants and unit, fostering cohesion and consistency.

Typically lasting around 14 weeks, the 19d OSUT training schedule is divided into distinct phases:

- **Initial Entry Training (IET) / Basic Combat Training (Weeks 1-10):** This phase focuses on foundational soldier skills, physical fitness, marksmanship, land navigation, and basic infantry tactics.
- **Advanced Individual Training (AIT) (Weeks 11-14):** The latter part of the

schedule emphasizes Cavalry Scout-specific skills, including reconnaissance techniques, vehicle operations, and advanced weapons training.

The training is conducted primarily at Fort Benning, Georgia, a renowned infantry training center that offers a rigorous environment for soldier development.

Physical Conditioning and Tactical Proficiency

Physical fitness is a cornerstone of the 19d OSUT training schedule. Recruits undergo daily physical training that includes running, calisthenics, obstacle courses, and combat conditioning to build endurance and strength. The physical demands are not merely for fitness testing but are integral to preparing soldiers for the intense, dynamic nature of infantry operations.

Tactical training starts early in the schedule, with emphasis on rifle marksmanship using the M4 carbine, squad movement techniques, and individual soldier skills. As the weeks progress, recruits learn to navigate terrain using map and compass, conduct reconnaissance patrols, and operate communications equipment essential for effective scouting missions.

Vehicle and Weapon Systems Training

A distinctive aspect of the 19d OSUT training schedule is the inclusion of vehicle training. Cavalry Scouts must master the operation and maintenance of light tactical vehicles such as the Humvee. This component includes both classroom instruction and hands-on driving exercises under varied terrain and weather conditions.

Weapon systems training also extends beyond the M4 rifle to include machine guns, grenade launchers, and anti-tank weapons. Recruits are trained in weapons assembly, disassembly, and live-fire exercises to ensure competence and confidence in combat scenarios.

Comparing 19D OSUT to Other Infantry Training Programs

The 19d OSUT training schedule stands apart from other infantry training pipelines like the 11B Infantryman MOS. While both share similarities in foundational combat skills, the 19d OSUT incorporates additional reconnaissance and vehicle operation training tailored for Cavalry Scouts.

Unlike split BCT and AIT programs, OSUT's integrated approach allows for a seamless transition between phases, which many trainees find beneficial for maintaining momentum and camaraderie. However, some argue that the condensed schedule can be more demanding due to the continuous training without a significant break between BCT and AIT.

Pros and Cons of the 19D OSUT Training Schedule

- **Pros:**

- Integrated training fosters unit cohesion and consistency.
- Comprehensive skill development covering infantry and reconnaissance specialties.
- Exposure to vehicle and advanced weapon systems enhances combat readiness.

- **Cons:**

- Intensive schedule with limited downtime may increase stress and fatigue.
- Less flexibility in training pace compared to separate BCT and AIT programs.
- High physical and mental demands require strong initial preparation.

Essential Components of the 19D OSUT Daily Routine

The daily schedule in the 19d OSUT training program is structured to maximize training efficiency while maintaining rigorous standards. A typical day might include:

1. **Physical Training (PT):** Early morning sessions focusing on cardiovascular fitness, strength, and endurance.

2. **Classroom Instruction:** Lessons on tactics, vehicle operations, land navigation, and weapons knowledge.
3. **Hands-on Training:** Practical exercises such as weapons handling, driving, patrol simulations, and fieldcraft.
4. **Meal and Rest Periods:** Scheduled breaks to refuel and recover.
5. **Evening Study and Preparation:** Time allotted for individual study, equipment maintenance, and planning.

This regimented routine ensures trainees receive balanced exposure to both theoretical and practical military skills, reinforcing learning through repetition and progressive challenges.

Training Adaptability and Readiness for Deployment

One of the strengths of the 19d OSUT training schedule is its focus on preparing soldiers for immediate integration into operational units after graduation. The combined training phases ensure that Cavalry Scouts are not only proficient in combat fundamentals but also skilled in reconnaissance tactics critical for modern battlefield scenarios.

Moreover, the continuous training environment simulates the intensity of deployment conditions, fostering resilience and adaptability. Drill sergeants emphasize teamwork, leadership, and decision-making under pressure, which are invaluable traits for soldiers entering active duty.

Impact of the 19D OSUT Training Schedule on Soldier Development

The structured progression from basic soldiering to specialized Cavalry Scout skills provides a comprehensive developmental framework. Graduates of the 19d OSUT program typically exhibit:

- **Enhanced physical endurance and combat readiness.**
- **Proficiency in a range of infantry weapons and tactical operations.**
- **Capability to operate and maintain military vehicles essential to cavalry units.**
- **Strong unit cohesion and leadership foundations established through continuous training.**

These qualities contribute directly to the operational effectiveness of cavalry scout units and the broader infantry community.

In summary, the 19d OSUT training schedule is a demanding yet comprehensive pathway that equips soldiers with the multifaceted skills required for effective reconnaissance and combat roles. Its integrated approach, combining physical conditioning, tactical training, and technical vehicle operation, ensures that graduates are well-prepared to meet the challenges of modern military operations.

19d osut training schedule: **Assessing the Impact of Psychomotor and Leadership**

Selection Tests on the Excellence in Armor Program Scott E. Graham, 1989 As part of the Skills Selection and Sustainment (S3) program, this research evaluated the potential effectiveness of spatial, psychomotor, and leadership scales as additional selection criteria for the Excellence in Armor (EIA) program. The S3 predictor tests were administered to 1,642 One Station Unit Training (OSUT) soldiers at the Fort Knox reception station. In addition, 479 19K (M1 tank crewmen) OSUT soldiers were given an engagement tank gunnery test on the high-fidelity Institutional Conduct of Fire Trainer (I-COFT). The I-COFT test included offensive and defensive engagements fired in normal and degraded operational modes. The primary analysis evaluated I-COFT speed and accuracy as a function of S3 spatial/psychomotor scores. The S3 spatial/psychomotor tests were a strong predictor of simulated tank gunnery performance, yielding a correlation of .54 with I-COFT speed/accuracy. The 2-1/2-month interval between the predictor and criterion tests suggests that the relationship should remain stable over time, and the relationship shrank only slightly when the EIA soldiers were given additional training. The results indicate that including the S3 tests in the EIA selection process would result in EIA graduates with stronger gunnery skills. Keywords: Personnel selection, Gunnery prediction, Unit conduct of fire trainer, Performance(human). (sdw).

19d osut training schedule: *To Fight Or Not to Fight?* Robert S. Cameron, 2010 Providing a narrative analysis of US Army reconnaissance, scout, and cavalry evolution from the post-World War I era through the Iraqi conflict, this book outlines key developments in the concepts governing reconnaissance units from the armored cavalry regiment down to the maneuver battalion scout platoon. The trend analysis included in these pages shows how mounted reconnaissance arrived at its current state. The author provides a clear depiction of past evolution to guide future

reconnaissance development--Command and General Staff College Combined Arms Center website.

19d osut training schedule: Post-Cold War Stephen A. Bourque, 2008-03-30 From the fall of the Berlin Wall in 1989 through the years immediately after the collapse of the World Trade Center and Pentagon in 2001, and within the administrations of George H. W. Bush, William J. Clinton, and George W. Bush, soldiers' lives underwent enormous changes. Without the benefit of national conscription, these professionals, nurtured on stories of World War II, Korea, and Vietnam, experienced repetitive tours of duty in one combat zone after another to an extent the warriors of earlier eras could never have imagined. They fought every kind of war during this period; high-intensity mechanized war, air and heliborne raids, peace-keeping activities, urban combat, counter-insurgency operations, refugee support, and counter-narcotics operations. What makes the story of this era's soldiers all the more compelling is that these activities took place as the American military actually decreased its military strength during the period, leading to more and longer tours of duty. The book also includes a timeline to put dates and events in better perspective, a comprehensive, topically arranged bibliography, and a thorough index.

19d osut training schedule: *The Army Military Occupational Specialty Database* Stephen J. Kirin, 1992 The U.S. Army will face demanding challenges to maintain a well-trained and ready force in the face of shrinking defense budgets. Given the extensive resources used to conduct individual training (i.e., personnel, facilities, and consumables), current training methods are facing especially intensive scrutiny. In response, the Army is developing several new training concepts that could reduce the cost of individual training. Such concepts include, for example, expanding the use of new training technologies, distributing training to field units, and substituting civilian for military training where this may be applicable. Current RAND research is developing and applying new analytical tools for assessing alternative training approaches. The objective is to assess new strategies that modify current training approaches, considering resource inputs, costs, and consequences of training changes. Because major costs are incurred during specialized skill training, especially for enlisted personnel, the research focuses most heavily on alternative strategies for training enlisted entry-level Military Occupational Specialties (MOS). This Note documents the Army Military Occupational Specialty Database (MOS-D), which was prepared as part of the research. MOS-D contains data describing training-relevant characteristics of 317 Army MOS as of FY90. The data set contains information describing entry prerequisites, characteristics of job-holders and entry-level training courses, and the nature of the work performed. The data set can be analyzed to compare and contrast enlisted entry-level occupations in a number of ways related to how training is conducted. Such analyses can be used to guide more intensive research on alternative training strategies and methods for specific and related occupations. This document focuses on the 242 MOS in MOS-D considered entry-level, active-Army occupations. (43 tables, 8 figures, 32 refs.).

19d osut training schedule: Expandability of the 21st Century Army James A. Dewar, 2000 This text discusses the current state of Army readiness and expandability as well as strategies and scenarios to prepare for light, heavy or rapid expandability needs. This assesment of the costs and benefits of the options also recommends action to enhance the Army's ability in the future.

19d osut training schedule: Development of a Personal Computer-based Enlisted

Personnel Allocation System (PC-EPAS) , 2001 This report summarizes the development of tile PC-Based Enlisted Personnel Allocation System (EPAS) through completion of the Functional Description phase (circa 1998). EPAS is a software system designed to introduce person-job-match optimization into REQUEST, the Army's training reservation system. This report reflects the results of research conducted and sponsored by the U.S. Army Research Institute over the 1993 - 1998 period. This work established the feasibility of using sophisticated optimization procedures to improve classification efficiency, as well as the additional classification gains made possible by utilizing measures of soldier performance as assignment composites in the classification process. The production version of EPAS, designed as an enhancement to and subsystem of REQUEST, will be transparent to Army applicant and career counselor. Evaluation field-testing is scheduled for FY 2002-2003.
