american tradition in literature 12th edition content: Integrating Service Learning and Multicultural Education in Colleges and Universities Carolyn R. O'Grady, 2014-04-08 The focus of this book is on the ways in which service learning and multicultural education can and should be integrated so that each may be strengthened and consequently have greater effect on educational and social conditions. It offers a significant attempt to forge a dialogue among practitioners of service learning and multicultural education. The overriding theme is that service learning without a focused attention to the complexity of racial and cultural differences can reinforce the dominant cultural ideology, but academic work that seeks to deconstruct these norms without providing a community-based touchstone isolates students and schools from the realities of the larger communities of which they are part. Although the chapter authors provide varied perspectives on the benefits and challenges of integrating multicultural education and service learning, they all are committed to a vision of education that synthesizes both action and reflection. None of the authors pretend to have all the answers to what this integration should look like, nor do they believe that today's social problems are easily ameliorated through education. Rather, they share theories, practices, failures, and triumphs in order to further the conversation about the importance of aligning what educators say about the world and how they act in and on it. These authors share the view that multicultural education is truly transformative for students only when it includes a community action component, and likewise, service learning is truly a catalyst for change only when it is done from a multicultural and socially just perspective. It is their hope that the ideas explored in this book will further the work of those who share a commitment to the integration of action and reflection.

american tradition in literature 12th edition content: An American Singing Heritage

Norm Cohen, Carson Cohen, Anne Dhu McLucas, 2021-12-20 This edition brings together representative transcriptions of folk songs and ballads in the British-Irish-American oral tradition that have enjoyed widespread familiarity throughout twentieth-century America. Within are the one hundred folk songs that most frequently occurred in a methodical survey of Roud's Folk Song Index, catalogues of commercial early country (or hillbilly) recordings, and relevant archival collections. The editors selected sources for transcriptions in a broad range of singing styles and representing many regions of the United States. The selections attempt to avoid the biases of previous collections and provide a fresh group of examples, many heretofore unseen in print. The sources for the transcriptions are recordings of traditional musicians from the 1920s through the early 1940s drawn from (1) commercial recordings of hillbilly musicians, and (2) field recordings in the collection of the Library of Congress's Archive of American Folk Song, now part of the Archive of Folk Culture. Each transcription is accompanied by a brief contextualizing essay discussing the song's history and influence, recording and performance information (whenever available), and an examination of the tune. The edition begins with a substantive essay about the history of folk song recordings and folk song scholarship, and the nature of traditional vocal music in the United States.

Jaffee, 2018-10-18 Nashaway became Lancaster, Wachusett became Princeton, and all of Nipmuck County became the county of Worcester. Town by town, New England grew—Watertown, Sudbury, Turkey Hills, Fitchburg, Westminster, Walpole—and with each new community the myth of America flourished. In *People of the Wachusett* the history of the New England town becomes the cultural history of America's first frontier. Integral to this history are the firsthand narratives of town founders and citizens, English, French, and Native American, whose accounts of trading and warring, relocating and putting down roots proved essential to the building of these communities. Town plans, local records, broadside ballads, vernacular house forms and furniture, festivals—all come into play in this innovative book, giving a rich picture of early Americans creating towns and crafting historical memory. Beginning with the Wachusett, in northern Worcester County, Massachusetts, David Jaffee traces the founding of towns through inland New England and Nova Scotia, from the mid-seventeenth century through the Revolutionary Era. His history of New England's settlement is one in which the replication of towns across the landscape is inextricable from the creation of a regional and national culture, with stories about colonization giving shape and meaning to New England life.
