black history month nyc 2023: The Conjuring of America Lindsey Stewart, 2025-07-29 One of BookRiot's Best New Nonfiction Out in July, a crucial telling of U.S. history centering the Black women whose magic gave rise to the rich tapestry of American culture we see today—from Vicks VapoRub and Aunt Jemima’s pancake mix, to the magic of Disney’s *The Little Mermaid* (2023), and the all-American blue jean. Emerging first on plantations in the American South, enslaved conjure women used their magic to treat illnesses. These women combined their ancestral spiritual beliefs from West Africa with local herbal rituals and therapeutic remedies to create conjure, forging a secret well of health and power hidden to their oppressors and many of the modern-day staples we still enjoy. In *The Conjuring of America*, Black feminist philosopher Lindsey Stewart exposes this vital contour of American history. In the face of slavery, Negro Mammies fashioned a legacy of magic that begat herbal experts, fearsome water bearers, and powerful mojos—roles and traditions that for centuries have been passed down to respond to Black struggles in real time. And when Jim Crow was born, Granny Midwives and textile weavers leveled their techniques to protect our civil and reproductive rights, while Candy Ladies fed a generation of freedom crusaders. Sourcing firsthand accounts the of enslaved, dispatches from the lore of Oshun, and the wisdom of beloved Black women writers, Stewart proves indisputably that conjure informs our lives in ways remarkable and ordinary. Above all, *The Conjuring of America* is a love letter to the magic Black women used to sow messages of rebellion, freedom, and hope.

Conditions in the pre-Prohibition twentieth century Lower East Side certainly fueled an explosion in gangs and racketeering. Such underworld giants as Meyer Lansky, Louis "Lepke" Buchalter and Salvatore "Charlie Luciano" Lucania were products of that overcrowded and hard environment. But that was just a small part of the area's underworld history. In this issue, Informer presents a collection of articles representing the seedy and bloody gangland history of the Lower East Side. black history month nyc 2023: *Black Movement* Jeffrey O. G. Ogbar, 2025-04-14 The Great Migration of African Americans from the South to northern and western cities between 1915 and 1970 fundamentally altered the political, social, and cultural landscapes of major urban centers like New York, Chicago, Philadelphia, and Detroit, and changed the country as well. By the late twentieth century, Black people were mayors, police chiefs, and school superintendents, often at parity and sometimes overrepresented in municipal jobs in these and other cities, which were also hubs for Black literature, music, film, and politics. Since the 1970s, migration patterns have significantly shifted away from the major sites of the Great Migration, where some iconic Black communities have been replaced by mostly non-Black residents. Although many books have examined Black urban experiences in America, this is the first written by historians focusing on the post-Great Migration era. It is centered on numerous facets of Black life, including popular culture, policing, suburbanization, and political organizing across multiple cities. In this landmark volume, Jeffrey O. G. Ogbar and his contributors explore the last half century of African American urban history, covering a landscape transformed since the end of the Great Migration and demonstrating how cities remain dynamic into the twenty-first century. Contributors are Stefan M. Bradley, Scot Brown, Tatiana M. F. Cruz, Tom Adam Davies, LaShawn Harris, Maurice J. Hobson, Shannon King, Melanie D. Newport, Jeffrey O. G. Ogbar, Brian Purnell, J. T. Roane, Chanelle Rose, Benjamin H. Saracco, and Fiona Vernal.

black history month nyc 2023: *A Seat at the Table* Hettie V. Williams, Melissa Ziobro, 2023-09-11 Contributions by Omar H. Ali, Simone R. Barrett, Tejai Beulah, Sandra Bolzenius, Carol Fowler, Lacey P. Hunter, Tiera C. Moore, Tedi A. Pascarella, John Portlock, Lauren T. Rorie, Tanya L. Roth, Marissa Jackson Sow, Virginia L. Summey, Hettie V. Williams, and Melissa Ziobro While Black women's intellectual history continues to grow as an important subfield in historical studies, there remains a gap in scholarship devoted to the topic. To date, major volumes on American intellectual history tend to exclude the words, ideas, and contributions of these influential individuals. *A Seat at the Table: Black Women Public Intellectuals in US History and Culture* seeks to fill this void, presenting essays on African American women within the larger context of American intellectual history. Divided into four parts, the volume considers women in politics, art, government, journalism, media, education, and the military. Essays feature prominent figures such as Shirley Chisholm, Oprah Winfrey, journalist Charlotta Bass, and anti-abortion activist Mildred Fay Jefferson, as well as lesser-known individuals. The anthology begins with a discussion of the founders in Black women's public intellectualism, providing a framework for understanding the elements, structure, and concerns central to their lives and work in the nineteenth century. The second section focuses on leaders in the Black Christian intellectual tradition, the civil rights era, and modern politics. Part three examines Black women in society and culture in the twentieth century, with essays on such topics as artists in the New Negro era; Joycelyn Elders, a public servant and former surgeon general; and America's foremost Black woman influencer, Oprah. Lastly, part four concerns Black women and their ideas about public service—particularly military service—with essays on service members during World War II and the post-WWII military. Taken as a whole, *A Seat at the Table* is an important anthology that helps to establish the validity and existence of heretofore neglected intellectual traditions in the public square.

black history month nyc 2023: *The Black Woods* Amy Godine, 2023-11-15 Winner of the Charles A. Weyerhaeuser Forest History Society Book Award *The Black Woods* chronicles the history of Black pioneers in New York's northern wilderness. From the late 1840s to the 1860s, they migrated to the Adirondacks to build the farms that helped them meet a \$250 property requirement imposed on Black New York voters in 1821. Abolitionist Gerrit Smith gifted 120,000 acres to 3,000 landless Black New Yorkers, with the support of Frederick Douglass, John Brown and other abolitionists. His prescient plan enacted affirmative action and distributive justice. But when most of his grantees did not move north, Smith's interest cooled. He would not visit Timbuctoo, Freeman's Home, or Blacksville. The settlers were on their own. In *The Black Woods*, Godine revives this history with stirring stories of frontier life and racial justice. She puts the vote-seeking Black pioneers at the heart of the Adirondack narrative. At long last, their shaping role has been reclaimed.

black history month nyc 2023: *The Coming of Neo-Feudalism* Joel Kotkin, 2023-01-10 Following a remarkable epoch of greater dispersion of wealth and opportunity, we are inexorably

returning towards a more feudal era marked by greater concentration of wealth and property, reduced upward mobility, demographic stagnation, and increased dogmatism. If the last seventy years saw a massive expansion of the middle class, not only in America but in much of the developed world, today that class is declining and a new, more hierarchical society is emerging. The new class structure resembles that of Medieval times. At the apex of the new order are two classes—a reborn clerical elite, the clerisy, which dominates the upper part of the professional ranks, universities, media and culture, and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information. These two classes correspond to the old French First and Second Estates. Below these two classes lies what was once called the Third Estate. This includes the yeomanry, which is made up largely of small businesspeople, minor property owners, skilled workers and private-sector oriented professionals. Ascendant for much of modern history, this class is in decline while those below them, the new Serfs, grow in numbers—a vast, expanding property-less population. The trends are mounting, but we can still reverse them—if people understand what is actually occurring and have the capability to oppose them.

black history month nyc 2023: Culturally Responsive and Sustaining Science Teaching Elaine V. Howes, Jamie Wallace, 2024-04-18 How can research into culturally responsive and sustaining education (CRSE) inform and transform science teaching and learning? What approaches might teachers use to study CRSE in their classrooms? What are teachers learning from their research that might be transferable to other classrooms and schools? In this practical resource, teacher researchers from the Culturally Responsive and Sustaining Education Professional Learning Group based in New York City provide insights for educators on how to address complex educational and sociocultural issues in the science classroom. Highlighting wide-ranging and complex problems such as the COVID-19 pandemic and racial injustice and how they affect individual science instruction settings, with a particular focus on urban and high-need school environments, chapters examine and describe what CRSE is and means for science teaching. Through individual and collaborative research studies, chapters help readers understand various approaches to developing and implementing CRSE strategies in their classrooms and promote students' identification with and affinity for science. Teachers describe the questions driving their investigations, data, and findings, and reflect on their roles as agents of change. Chapters also feature discussion and reflection questions, and include examples of assignments, protocols, and student work that teachers have piloted in their classes. This book is ideal for pre-service and in-service science teachers and teacher educators across grade levels. It provides support for professional learning activities, as well as undergraduate and graduate teacher education courses. It may be particularly useful in science methods, multicultural education; and diversity, equity, and inclusion courses with a focus on CRSE. This book not only defines one group's approach to CRSE in science education, but also takes the next step to show how CRSE can be applied directly to the science classroom.

black history month nyc 2023: Organize or Burn Fabian Holt, 2025-10-21 A successful political playbook for fighting climate change and expanding democracy from the New York socialist movement Climate inaction is already causing widespread suffering and devastation around the

world. How can citizens take collective action? Fabian Holt argues that we must go beyond protest and direct action, and turn to the potential of hybrid organizations that bring together social movements and political parties. One such “movement party” with recent political success is the New York City chapter of the Democratic Socialists of America (NYC-DSA), which has become the city’s main organization for movement climate politics, running multi-year climate pressure campaigns and a slate of climate-focused electoral campaigns, as well as spearheading the first Green New Deal legislation in the country, the New York State Build Public Renewables Act of 2023. *Organize or Burn* situates the NYC-DSA in the history of the democratic socialist movement in the United States, combining a political history of the insurgent international left with a richly textured local ethnography of the organization’s place in the climate movement and relationship to the Democratic Party. Holt argues that NYC-DSA has developed a distinct approach to political organizing that has broad relevance to citizen climate mobilization. The organizational innovation specifically involves integrating micro-level organizing in individual campaigns and macro-level organization-building, synthesizing approaches from traditions of social movements and electoral campaigns in the US. Ultimately, Holt shows that NYC-DSA can offer powerful lessons in how political collective action can be meaningful in the present moment of political turbulence, from the very concrete perspective of a local movement world. An engaging read for political organizers, scholars, and concerned citizens, *Organize or Burn* provides new insights and solutions for the climate crisis.
