just so stories for children: Kipling's Children's Literature Sue Walsh, 2016-04-22 Despite Kipling's popularity as an author and his standing as a politically controversial figure, much of his work has remained relatively unexamined due to its characterization as 'children's literature'. Sue Walsh challenges the apparently clear division between 'children's' and 'adult' literature, and poses important questions about how these strict categories have influenced critical work on Kipling and on literature in general. For example, why are some of Kipling's books viewed as children's

literature, and what critical assumptions does this label produce? Why is it that Kim is viewed by critics as transcending attempts at categorization? Using Kipling as a case study, Walsh discusses texts such as *Kim*, *The Jungle Books*, the *Just-So Stories*, *Puck of Pook's Hill*, and *Rewards and Fairies*, re-evaluating earlier critical approaches and offering fresh readings of these relatively neglected works. In the process, she suggests new directions for postcolonial and childhood studies and interrogates the way biographical criticism on children's literature in particular has tended to supersede and obstruct other kinds of readings.

just so stories for children: *Just So Stories (1912)* by : Rudyard Kipling Rudyard Kipling, 2017-01-20 *Just So Stories for Little Children* is a 1902 collection of origin stories by the British author Rudyard Kipling. Considered a classic of children's literature, the book is among Kipling's best known works. Kipling began working on the book by telling the first three chapters as bedtime stories to his daughter Josephine. These had to be told just so (exactly in the words she was used to) or she would complain. The stories describe how one animal or another acquired its most distinctive features, such as how the Leopard got his spots. For the book, Kipling illustrated the stories himself. The stories have appeared in a variety of adaptations including a musical and animated films. Evolutionary biologists have noted that what Kipling did in fiction, they have done in reality, providing explanations for the evolutionary development of animal features. The stories, first published in 1902, are origin stories, fantastic accounts of how various features of animals came to be. A forerunner of these stories is Kipling's *How Fear Came*, in *The Second Jungle Book* (1895). In it, Mowgli hears the story of how the tiger got his stripes. The *Just So Stories* each tell how a particular animal was modified from an original form to its current form by the acts of man, or some magical being. For example, the Whale has a tiny throat because he swallowed a mariner, who tied a raft inside to block the whale from swallowing other men. The Camel has a hump given to him by a djinn as punishment for the camel's refusing to work (the hump allows the camel to work longer between times of eating). The Leopard's spots were painted by an Ethiopian (after the Ethiopian painted himself black). The Kangaroo gets its powerful hind legs, long tail, and hopping gait after being chased all day by a dingo, sent by a minor god responding to the Kangaroo's request to be made different from all other animals. The *Just So Stories* began as bedtime stories told to his daughter Effie [Josephine, Kipling's firstborn]; when the first three were published in a children's magazine, a year before her death, Kipling explained: in the evening there were stories meant to put Effie to sleep, and you were not allowed to alter those by one single little word.
