In this treatise, you will feel the agony of women and the struggle of mother earth. In the beginning of my book, I have mentioned my motive behind fusing two hot and current issues in one treatise. My first topic is on Women

empowerment and second topic will give you proper thought based knowledge about our mother earth. This is entirely a thought based non-fiction book and you will see minimal use of statistics or any other bookish stuff. Besides the non-fiction part of this book, you will also find some short stories and poetries. The first poem is written by author himself and the other two sweet poems are written by two beautiful teeny girls. These short stories and poetries will work as a mood changer. In addition, the sense behind inserting stories and poems in this non-fiction is that this book contains very serious and positive chapters, so for adding more positivity in the book, I thought of an experiment via inserting some sweet teeny poems and heart touching stories.

katie piper before and after: The Trial of "Indian Joe" Clare Vernon McKanna, 2003-01-01 On the night of 16 October 1892, a double homicide occurred on Otay Mesa in San Diego County near the Mexican border. The two victims were an elderly couple, John and Wilhelmina Geyser, who lived on a farm on the edge of the mesa. Within minutes of discovering the crime, neighbors subdued and tied up the alleged killer, Josä Gabriel, a sixty-year-old itinerant Native American handyman from El Rosario, California, who worked for the couple. Since Gabriel was apprehended at the scene, most presumed his guilt. The local press, prosecutors, witnesses, and jurors called him by the epithet ?Indian Joe.? ø The sensational murder trial of Gabriel highlights the legal injustices committed against Native Americans in the nineteenth century. During this time, California Native Americans could not vote or serve on juries, so from the outset Gabriel was unlikely to receive a fair trial. No motive for murder was established, and the evidence against Gabriel was inconclusive. Nonetheless, the case went forward. Drawing on court testimony and newspaper accounts, Clare V. McKanna Jr. traces the murder trial: the handling of the case by the prosecution, the defense, the jury, and the judge; an examination of the crime scene; and the imaging of ?Indian Joe.? Through his considerable research, McKanna sheds light on a dark time in the American legal system.

McKanna, 2007-08-23 Nineteenth-century California was a society in turmoil, with a rapidly growing population, booming mining camps, insufficient or nonexistent law-enforcement personnel, and a large number of ethnic groups with differing attitudes toward law and personal honor. Violence, including murder, was common, and legal responses varied broadly. Available now for the first time in paperback, *Race and Homicide in Nineteenth-Century California* examines coroners' inquest reports, court case files, prison registers, and other primary and printed sources to analyze patterns of homicide and the state's embryonic justice system. Author Clare V. McKanna discovers that the nature of crimes varied with the ethnicity of perpetrators and victims, as did the conduct and results of trials and sentencing patterns. He presents specific case studies and a vivid portrait of an unruly society in flux. Enhanced with testimony from contemporary sources and illustrated with period photographs, this study richly portrays a frontier society where the law was neither omnipotent nor impartial.

katie piper before and after: Understanding Visible Differences Vivienne Purcell, 2020-11-25
This book provides an evidence-based guide to working with visible difference in therapeutic practice. It explores how appearance problems intersect with other concerns causing mental health issues and provides clear guidance on treatment plans and related topics. Visible difference is a bigger cause of mental distress than is often realised. One in five people have an appearance that is considered 'different' to the normal population. The category of 'visible difference', previously described as 'disfigurement' or simply 'disability' captures a range of conditions with varying aetiology, severity, and extent. Differences in appearance can be the result of a birth anomaly, or be caused later in life through illness, physical trauma, or behaviour. Whatever the cause, visible difference can have a negative effect on how individuals are perceived and view themselves. This timely work arrives at a moment of rising professional interest, due to the growth of social media use and the focus this puts on appearance ("the amplification of appearance bias"), and also influenced by the implications new research. The author draws on these findings together with her own research and practice to examine best practice and key issues in addressing visible difference. Particular consideration is given to establishing a good working therapeutic relationship. Whether a trainee, a recently qualified therapist, or an experienced professional wanting to broaden their understanding, this is the ideal text for anyone wanting to better understand this growing area of therapeutic practice.

Data is drawn from the international literature and the analysis of primary data collected in the UK (which is thought to have one of the highest rates of acid attacks in the world) from interviews with over 20 convicted offenders and from police case files relating to over 1,000 crimes involving corrosive substances. This book adds significantly to the international literature on weapons carrying and use, which to date has predominantly focused around the possession and use of guns and knives.
