The election of President Barack Obama signaled for many the realization of a post-racial America, a nation in which racism was no longer a defining social, cultural, and political issue. While many Americans espouse a colorblind racial ideology and publicly endorse the broad goals of integration and equal treatment without regard to race, in actuality this attitude serves to reify and legitimize racism and protects racial privileges by denying and minimizing the effects of systematic and institutionalized racism. In *The Colorblind Screen*, the contributors examine television's role as the major discursive medium in the articulation and contestation of racialized identities in the United States. While the dominant mode of televisual racialization has shifted to a colorblind ideology that foregrounds racial differences in order to celebrate multicultural assimilation, the volume investigates how this practice denies the significant social, economic, and political realities and inequalities that continue to define race relations today. Focusing on such iconic figures as President Obama, LeBron James, and Oprah Winfrey, many chapters examine the ways in which race is read by television audiences and fans. Other essays focus on how visual constructions of race in dramas like *24*, *A Sleeper Cell*, and *The Wanted* continue to conflate Arab and Muslim identities in post-9/11 television. The volume offers an important intervention in the study of the televisual representation of race, engaging with multiple aspects of the mythologies developing around notions of a post-racial America and the duplicitous discursive rationale offered by the ideology of colorblindness.

What's worse, Black, Indigenous, Asian, and Latina women are being held back more than their White counterparts. We need to change how we strive for equity. We must move beyond individual solutions toward collective action, where people from historically power-dominant and marginalized groups work together, so that all women experience

Professor Tina Opie first started Shared Sisterhood as a movement to drive gender and racial equity in organizations. Since then, she and professor Beth A. Livingston have worked together to spread the word to leaders across organizations, with thousands of followers joining the cause. In this book, they explain how to use vulnerability, trust, empathy, and risk-taking to build Shared Sisterhood and break down three key parts of the process: Dig into your own assumptions around racioethnicity, gender, and power Bridge the divide between women of all backgrounds through authentic relationships Advance all women across the organization and beyond Balancing a mix of history, research, and real-life examples—including the authors' own experiences—this book encourages everyone to join Shared Sisterhood and advance equity for all.
